## **1.0 INTRODUCTION**

In accordance with the Florida Department of Transportation (FDOT) Project Development and Environment (PD&E) Manual Part 2, Chapter 20 (effective July 1, 2020), this Contamination Evaluation Screening was conducted to evaluate an approximately 6.17-mile segment of the Selmon Expressway, from the I-4 Connector to US 301 (“Project Site”). The project limits are within the County of Hillsborough, as shown in **Figure 1**.

The purpose of this report is to document historical and environmental regulatory information that would be indicative of potential environmental hazards in connection with the Project Site. This report identifies and evaluates known or potential contamination sites within or adjacent to the project area that may affect implementation of the project.

## **2.0 PROJECT DESCRIPTION**

The Tampa Hillsborough Expressway Authority (THEA) is conducting a Project Development and Environment (PD&E) Study to evaluate the needs, costs, and effects of constructing improvements that will increase traffic capacity and safety on the Selmon Expressway (SR 618) from the I-4 Connector to US 301 in Hillsborough County (Figure 1). The project involves adding an additional lane in each direction along the mainline Selmon Expressway (SR 618) from the I-4 Connector to US 301. The total project length is 6.17 miles.

Within the project limits, the Selmon Expressway generally provides two or three lanes in each direction along the local lanes with access to the I-4 Connector, 50th Street, 78th Street and US 301. The REL is generally located in the median of the Selmon Expressway with three lanes from Downtown Tampa to Palm River Road and two lanes from Palm River Road across I-75 and into Brandon. The REL provides additional system capacity to the peak direction of traffic with access available to westbound traffic in the morning and eastbound traffic in the afternoon. When the project is completed, the local lanes would provide three to four lanes in each direction.

## **3.0 METHODOLOGY**

### **3.1 DATA COLLECTION**

A preliminary evaluation of was conducted to determine potential contamination from properties or operations located within the vicinity of the project alternatives. This evaluation consisted of the following tasks:

- A. A search of the online resources provided by the U.S. Environmental Protection Agency (EPA) and the Florida Department of Environmental Protection (FDEP). The EPA Enforcement and Compliance History Online (ECHO) system supplies information on hazardous waste and National Priority List (NPL, Superfund) sites, and the FDEP Map Direct resource provides online viewing of site-specific regulated facilities within the State of Florida.

- B. A review of the Database Report generated by ERIS, which includes a search of the following thirty-five (35) Federal and twenty-two (22) State standard search radii databases (listed below) and an additional thirty-three (33) Federal and fifteen (15) State databases within a 1/2-mile radius of the project corridor (i.e., the project study area):

- C. A review of historical aerial photographs of the project study area, dated 1938, 1950, 1957, 1965, 1969, 1979, 1987, 1995, 1999, 2007, 2013, and 2019 provided by GeoSearch.
- D. A review of historical topographic maps for the project study area, dated 1943, 1956, 1969, 1981, 1987, 1995, and 2012, provided by GeoSearch.
- E. Visual reconnaissance of the project study area was conducted on July 11, 17, and 18<sup>th</sup> and October 11, 2023 by environmental staff members from Kimley-Horn and Associates, Inc. to identify sites or areas with indications of past or present contaminant storage, use, generation, or disposal. Potential sites were visually examined to the extent of available access for evidence of possible contamination.

Copies of the ERIS reports are included in **Appendix A**. Fire Insurance Maps (FIMs) were not available for the project study area. Online database review records are provided in **Appendix B**. Site photos are provided in **Appendix C**. Following site reconnaissance and database review, each identified site was evaluated based on the risk assessment rating system described in the FDOT PD&E Manual Volume 2, Chapter 20, effective July 1, 2020, as summarized below.

## **3.2 POTENTIAL IMPACT DETERMINATION**

The contamination rating system is divided into four degrees of risk: No, Low, Medium, and High. This system expresses the degree of concern for potential contamination problems. Known problems may not necessarily present a high cause for concern if the regulatory agencies are aware of the situation and actions, where necessary, are either complete or are underway, and these actions will not have an adverse impact on the proposed project.

The rating can also change based on changes in design, construction activities, construction methods, R/W needs, or other factors when the project progresses from design to construction.

### **3.2.1 No Risk**

A review of available information on the property and a review of the conceptual or design plans indicates there is no potential contamination impact to the project. It is possible that contaminants had been handled on the property. However, findings from the contamination screening evaluation or sampling and testing results indicate that contamination impacts are not expected.

### **3.2.2 Low Risk**

A review of available information indicates that former or current activities on the property have an ongoing contamination issue, has a hazardous waste generator identification (ID) number, or the site stores, handles, or manufactures hazardous materials. However, based on the review of conceptual or design plans and/or findings from the contamination screening evaluation, it is not likely that there would be any contamination impacts to the project.

### **3.2.3 Medium Risk**

After a review of conceptual or design plans and findings from a contamination screening evaluation, a potential contamination impact to the project has been identified. If there is insufficient information (such as regulatory records or site historical documents) to determine as to the potential for contamination impact, and there is reasonable suspicion that contamination may exist, the property should be rated at least as a "Medium". Properties used historically as gasoline stations and which have not been evaluated or assessed by regulatory agencies, sites with abandoned in place underground petroleum storage tanks or currently operating gasoline stations should receive this rating.

### **3.2.4 High Risk**

After a review of all available information and conceptual or design plans, there is appropriate analytical data that shows contamination will substantially impact construction activities, have implications to R/W acquisition or have other potential transfer of contamination related liability.

A recommendation for each site with a rating of medium or high should include a listing of the analytical parameters of concern and media (e.g., soil, groundwater), a discussion of potential involvement with right-of-way acquisition and/or construction and if the site is anticipated to warrant additional (Level II or III) assessment.

## 4.0 LAND USES

Historical land uses were observed from aerial photographs provided by GeoSearch (**Appendix A**). The following is a discussion of the historical use of the project study area.

### 4.1 PREVIOUS LAND USE

For the purposes of this discussion, the western portion of the project area is from the I-4 connector to 78<sup>th</sup> Street, and the eastern portion of the project area is considered from 78<sup>th</sup> Street to US 301.

TIME FRAME	WESTERN PORTION	EASTERN PORTION
Pre-1950	Undeveloped, with the exception of US 41, minor roads, and the Bypass Canal waterway. Further to the west, residences and small commercial businesses are observed along the northern side of the project area.	Undeveloped, with the exception of 78 <sup>th</sup> Street, a drainage canal, Palm River Road, and US 301.
1950-Mid-1960s	Mostly unchanged, with the exception of borrow pits and State Road (SR) 60 along the northern side of the project area.	Mostly unchanged, with the exception of State Road (SR) 60 visible to the north. Some residences and small commercial structures are visible at major roadway intersections.
Mid 1960s to mid-1980s	Bypass Canal waterway is under construction from US 41 to 78 <sup>th</sup> Street. Further light industrial and commercial development is observed along SR 60.	Unchanged until additional residential development is observed on the southern side of the project area.
Mid 1980s to 2010	The current Crosstown Expressway has been constructed, with entry/exit ramps visible at US 41. Several businesses are visible along the SR 60 corridor.	The current Crosstown Expressway has been constructed, with entry/exit ramps visible at Interstate 75, Falkenburg Road, US 301 and 78 <sup>th</sup> Street. Some light industrial/

		warehouse facilities are visible along the northern side of the project corridor.
2010 to present	Appears as it does today, with residential and commercial land use surrounding the project area.	Appears as it does today, with residential and commercial land use surrounding the project area.

## 4.2 CURRENT CONDITIONS

Existing land use within the project corridor was determined through the interpretation of 1" = 500' scale aerial photography and based on field reconnaissance of the project corridor that was conducted on July 11, 17 and 18, and October 11, 2023. Existing land use was mapped based on the Florida Land Use layer data provided by the Southwest Florida Water Management District (SWFWMD) for the project area and is depicted in **Figure 2**.

The existing land use can be generally characterized by primarily residential use to the south and industrial use north of the project area. Tampa Bypass canal is visible adjacent to the south of the project corridor.

## 5.0 HYDROLOGIC FEATURES

There are three principal hydrogeologic units that comprise the ground water system in Hillsborough County. These units include the surficial aquifer system (SAS), the Intermediate Aquifer System (IAS), and Upper Floridan Aquifer System (UFA). The Floridan Aquifer is the significant groundwater source within Hillsborough County. The surficial aquifer system in the county is unconfined and consists of the unconsolidated sediments from the land surface to the clay confining layer, the IAS. The unconsolidated sediments are composed primarily of Holocene to Pliocene age quartz sand, silty sand, and clayey sand. The thickness of the aquifer ranges from less than 1 foot to over 200 feet depending upon the land surface topography and the depth of the underlying clay confining unit. The IAS is present throughout much of the county and consists of permeable sand, limestone, and dolomite of Pliocene to Miocene age. These deposits include the Peace River and Arcadia Formation of the Hawthorn Group as well as undifferentiated Pliocene-age deposits. Underlying the IAS is the Upper Floridan Aquifer which consists of carbonate units ranging in age from Oligocene to Eocene. The units that comprise the UFA include, in descending order, the Suwannee Limestone, the Ocala Limestone and the Avon Park Formation.

*USGS Ground Water Atlas of the United States, Chapter HA 730-G, Alabama, Florida, Georgia, and South Carolina, by James A. Miller, (1990)*

## 6.0 PROJECT IMPACTS

This section describes facilities within the project study area (500-foot corridor buffer) with the potential to impact the proposed project. Per the FDOT PD&E manual, facilities are evaluated within the following search buffers:

1. 500 feet from the ROW line for petroleum, drycleaners, and non-petroleum sites. Corridor projects in heavily industrialized or urbanized areas with dewatering planned near the contaminated sites need to be addressed with FDEP, WMD, or the local delegated program lead.
2. 1,000 feet from the ROW line for non-landfill solid waste sites (such as recycling facilities, transfer stations and debris placement areas).
3. 1/2 mile from the ROW line for CERCLA, National Priorities List (NPL) Superfund sites, or Landfill sites. Include a detailed discussion of these sites if they are expected to potentially impact the project. Coordinate with OGC and environmental permitting agencies, as appropriate.

As described in Table 1 below, there were no non-landfill solid waste sites identified within 1000 feet from the ROW line or CERCLA, NPL Superfund Sites, or Landfill sites identified within ½ mile of the ROW line.

## **6.1 REVIEW OF READILY AVAILABLE RECORDS**

Information from the following online databases was reviewed:

- EPA's Enforcement & Compliance History Online (ECHO)
- EPA's NEPAssist Database
- FDEP's Map Direct Database.
- FDOH's EH Water Well Surveillance Database
- SWFWMD Water Management Information System (WMIS)
- USGS National Water Information System Database (NWIS)

Records of regulated facilities on and surrounding the project corridor were reviewed using the U.S. EPA's ECHO and NEPAssist databases. Several facilities were identified within the search buffers and are discussed further in **Table 3**.

Records of State regulated facilities on or surrounding the subject property were also reviewed using the FDEP's Map Direct database. Several facilities were identified within the search buffers and are discussed in **Table 3**.

Records of well construction permit (WCP) wells within the immediate project area were reviewed using the FDOH's EH Water Well Surveillance, Southwest Florida Water Management District's Water Management Information System (WMIS) database, and the USGS National Water Information System (NWIS) database. No public supply wells were identified on the FDOH Water Well Surveillance Database within 0.5 miles of the project area. Six (6) domestic wells were identified within 0.25 miles of the project area. Should any wells exist within the project corridor that are not in use, or intended to be used, that will be impacted by construction, the wells will need to be properly abandoned.

Copies of the information reviewed are included in **Appendix B**.

**Figure 3** shows the locations of the potential contamination sites, while **Table 1** provides a summary of the sites' contamination concerns and risk evaluation ratings. Approximate distances from the potential contamination site(s) to the proposed right-of-way are also given. Relevant documentation of potential contamination information was available for seventy-nine (79) sites.

**TABLE 1 - POTENTIAL CONTAMINATION SITES SUMMARY**

Site No.	Site ID. per ERIS Radius Report	Facility Name	Location/ Address	County	Facility ID	Distance from ROW	Potential Concern(s)	Site History and Potential Contamination Parameters	Risk Evaluation Rating
001	75	Unknown	Palm River Road & 86th Street, Tampa, FL	Hillsborough	Spills: 12488	Within ROW	Chlorine spill	This listing indicates a spill of 25 pounds of chlorine that occurred as a result of a vehicle accident in October 2001. Based on the type of material and de minimis quantity reportedly spilled, this listing represents <b>No</b> risk.	No Risk
002	29, 30, & 236	Dale Patten Plaza-Crosstown Expressway-FDOT	78th St S, Tampa, FL 33619	Hillsborough	8736812	Within ROW	Diesel AST and Former Diesel UST	The Dale Patten Plaza facility currently contains one 1,000-gallon emergency generator diesel aboveground storage tank (AST) which was installed in June 2005. The facility also historically contained one 275-gallon emergency generator diesel underground storage tank (UST) which was removed from the site in 1999. The facility reported a petroleum discharge in October 1999, which subsequently received regulatory closure via Site Rehabilitation Completion Order (SRCO) in April 2001. The facility had an inspection in January 2021 that resulted in a compliance violation due to failure to conduct annual overfill protection tests and for evidence of AST piping in need of repair. Documentation of resolution of this compliance issue was not found on FDEP's OCULUS database. Based on the regulatory status of the facility and the lack of additional reported discharges, the facility is assigned a <b>Low</b> risk.	Low
003	118	Adamo Drive and 34th Street	34th St & Adamo Dr, Tampa, FL 33605	Hillsborough	46459SP	Target Property/south adjoining	Multiple petroleum spills	A release of approximately 150 gallons of diesel fuel spilled during a vehicle accident that was reported at the intersection of 34th Street and Adamo Drive in January 2012. This intersection is located approximately 80 feet north of the project ROW across a canal. No additional information regarding cleanup or other documentation was readily available. Based on the current regulatory status and distance from the project ROW, it is not anticipated that this spill will significantly impact construction activities. As such, this incident is assigned a <b>Low</b> risk.	Low
004	N/A	Grow Financial Federal Credit Union	9927 Delaney Lake Dr, Tampa, FL 33619	Hillsborough	9808012	250 feet North	Diesel Emergency Generator ASTs	The facility has two 1,600-gallon emergency generator ASTs containing diesel fuel that were installed February 2005. A storage tank inspection was conducted in August 2021, which noted compliance violations from failing to annually test the storage tank system overfill and release detection devices. On August 17, 2021, the facility received a letter from the Hillsborough County EPC notifying that they had returned to compliance. The facility currently operates as a credit union and is assigned a <b>Low</b> risk.	Low

**TABLE 1 - POTENTIAL CONTAMINATION SITES SUMMARY**

Site No.	Site ID. per ERIS Radius Report	Facility Name	Location/ Address	County	Facility ID	Distance from ROW	Potential Concern(s)	Site History and Potential Contamination Parameters	Risk Evaluation Rating
005	99, 100	Parrino Parcel	NW Corner of US Highway 301 South & Tampa Crosstown Expressway, Tampa	Hillsborough	ERIC_13906 COM_274774	Adjacent West	Arsenic Impacted Soil and Groundwater, Former Cattle Dip Vat	This site was formerly part of a cattle dairy farm, which included cattle dipping vats (CDV). In October 2006, due diligence activities identified arsenic impacted soils and groundwater, in addition to an area of buried debris. These results were presented to FDEP, which indicated that a Site Assessment Report (SAR) was required since the site was being redeveloped. This request was reiterated in 2010; however, the property owner indicated that the redevelopment deal fell through and that he had no intention on redeveloping the property and would not be conducting site assessment activities. The owner of the property was afforded that option since the FDEP has indicated that there is no requirement in the State of Florida for a private landowner having a CDV on their property to take corrective action to address possible environmental impacts. However, this property has since been redeveloped with a Goodwill Thrift Store distribution facility. Since the previously identified contaminant impacts appear to have never been fully evaluated, this site is assigned a <b>Medium</b> risk.	<b>Medium</b>
006	N/A	USAA Crosstown B	9519 Delaney Creek, Blvd Tampa, FL 33619	Hillsborough	9816497	Adjacent Northeast	Diesel Emergency Generator AST	The facility has one 810-gallon emergency generator AST containing diesel fuel that was installed in October 2018. A storage tank inspection was conducted in November 2020 and a violation was recorded from failing to annually test the storage tank system release detection devices. On November 25, 2020, the facility received a letter from EPC notifying that they had returned to compliance. Due to the status of this facility and lack of reported discharges, this facility is assigned a <b>Low</b> risk.	<b>Low</b>
007	112, 115, 117, 126	Industrial Vacuum	2210 HWY 301 S Tampa, FL 33619	Hillsborough	ERIC_15102 FLD157135336	Adjacent East	Volatile Organic Compounds Recorded in Surface Water, Sediments, and Drums Onsite	Historically, this facility was occupied by Industrial Vacuum and is now occupied by Adventure Archery. In January 1987, a site investigation was completed by NUS Corporation for EPA Region IV that identified several drums and a surface water feature. Samples collected from the drums, sediment, and surface water identified elevated concentrations of volatiles in one drum and low-level concentrations of various volatiles. Based on the concentrations identified and lack of surrounding groundwater users, no further CERCLA action was warranted. No information was provided regarding further assessment of sediment and surface water. Additionally, this facility historically contained a 1,000-gallon waste oil AST that was installed prior to 1994 and has since been removed. Lacking any further investigation of the concentrations identified, this facility is assigned a <b>Medium</b> risk.	<b>Medium</b>

**TABLE 1 - POTENTIAL CONTAMINATION SITES SUMMARY**

Site No.	Site ID. per ERIS Radius Report	Facility Name	Location/ Address	County	Facility ID	Distance from ROW	Potential Concern(s)	Site History and Potential Contamination Parameters	Risk Evaluation Rating
008	89, 116	Colonnade Crosstown, LLC Brownfield Area	NW Corner of US Highway 301 South & Tampa Crosstown Expressway, Tampa	Hillsborough	BF292001000 R20-083 ERIC_15371	Adjacent Southwest	Brownfield Site, Arsenic-Impacted Soils and Groundwater	<p>The Colonnade Crosstown, LLC Brownfield Site is composed of seven parcels (Folio Numbers: 044589-0000, 044595-0000, 044597-0000, 044650-0000, 044651-0000, 071991-0000, 044661-0000) of land that totals 158 acres and was designated as a Brownfield Area under Resolution No. R20-083 on September 17, 2020. This facility was historically utilized as a dairy farm since 1934 that contained two cattle dip vats. Arsenic-impacted soil and groundwater were identified around the two cattle dip vats and a farm equipment storage area. An Interim Source Removal was performed and approved by EPC in early 2023, in which impacted soil and groundwater were removed from the site. Arsenic-impacted groundwater still remains, and groundwater monitoring is required to be conducted as part of a Natural Attenuation Monitoring (NAM) Plan that was submitted to EPC in February 2023. The NAM Plan is still pending approval.</p> <p>The site is currently under construction for a new distribution center. New groundwater monitoring wells are proposed to be installed at the new facility as part of the NAM Plan. Based on the latest assessment data, the extent of groundwater contaminant impacts appears to lie approximately 375 feet southwest of the project ROW. Historical groundwater flow is depicted towards the west/northwest, away from the project ROW. Additional groundwater monitoring will be conducted under the NAM Plan to evaluate the extent and concentrations of the arsenic plume. Based on the distance of the documented groundwater impacts from the ROW, the site is assigned a <b>Medium</b> risk.</p>	Medium
009	82	Altec Industries Inc.	1041 S 86th St, Tampa, FL 33619	Hillsborough	110070431478 FLR000228742	420 feet West	RCRA Generator	<p>The facility is designated as a RCRA Very Small Quantity Generator (VSQG). The VSQG designation indicates that this facility generates less than 100 kilograms per month of hazardous waste. Hazardous waste associated with this facility includes ignitable waste (D001), corrosive waste (D002), mercury (D009), and non-halogenated solvents (F003 and F005). The facility currently operates as a commercial and industrial machinery and equipment repair and maintenance facility, with no reported RCRA violations, and is associated with a <b>Low</b> risk.</p>	Low
010	85	Evergreen Development & Construction Co	8659 Palm River Rd, Tampa, FL 33619	Hillsborough	110020489363 FLR000112755	100 feet East	RCRA Generator	<p>The facility is designated as a RCRA VSQG. Hazardous waste associated with this facility includes ignitable waste (D001). The facility is currently occupied by a light industrial facility, including an office building, warehouse and materials lay-down yard. The facility received a notice of violations in 2004 pertaining to improper registration/documentation as a used oil transport facility. The violations were subsequently resolved. No discharges have been reported for this facility, and it is assigned a <b>Low</b> risk.</p>	Low

**TABLE 1 - POTENTIAL CONTAMINATION SITES SUMMARY**

Site No.	Site ID. per ERIS Radius Report	Facility Name	Location/ Address	County	Facility ID	Distance from ROW	Potential Concern(s)	Site History and Potential Contamination Parameters	Risk Evaluation Rating
011	80	TCF Manufacturing	1020 S 86th St, Tampa, FL 33619	Hillsborough	110035648270 FLT010067502	Adjacent West	RCRA Generator	This facility is designated as a RCRA VSQG. The VSQG designation indicates that this facility generates less than 100 kilograms per month of hazardous waste. No hazardous waste information was reported for the facility. No violations were reported for this facility at the time of this report. The facility currently operates as a manufacturing facility and is associated with a <b>Low</b> risk.	<b>Low</b>
012	73, 74	Former Redwing Trucking/Redwing Carriers/Rentokil Environmental Srvc	8417 & 8515 Palm River Rd, Tampa, FL 33619	Hillsborough	BF291303000 8625227 COM_65125 ERIC_13704 FLD044019032	200 feet West	Former Fuel ASTs, Brownfield Site, Ongoing NAM	This facility lies within a Brownfield Area ("Former Redwing Facility Trucking Area") which was designated by Hillsborough County in May 2014 under Resolution No. BF291303000. The facility previously contained six ASTs containing diesel and unleaded gas used for vehicular fueling. Five of the ASTs were removed October 1988 and one was removed September 2000. The facility reported a petroleum discharge on October 1988 during the removal of the five ASTs. Site assessment and remedial activities were subsequently performed at the site. The facility entered into a Brownfield Site Rehabilitation Agreement (BSRA) with FDEP in May 2014 to address environmental impacts associated with the former Redwing Carrier facility. The facility is currently following a Natural Attenuation Monitoring Plan (NAM) evaluating the shallow surficial aquifer underlying the site. The latest NAM event, conducted in April 2023, revealed that certain contaminants of concern, including metals, fluoride, sulfate, and vinyl chloride, exceeded groundwater cleanup target levels (GTCLs) and the extent of groundwater impacts is not fully delineated to the east, in the direction of the project ROW. Based on the proximity of the documented groundwater impacts to the project ROW, this facility is assigned a <b>High</b> risk.	<b>High</b>
013	N/A	Inland Waters Pollution Control Inc.	8955 Palm River Rd, Tampa, FL 33619	Hillsborough	FL0000613638	470 feet East	Former RCRA SQG	The Inland Water Pollution Control Inc. facility was formerly designated as a RCRA Small Quantity Generator (SQG), although the latest OCULUS documentation lists the facility as Closed/Moved as of 1996. The facility received a notice of violations in 1995 pertaining to improper documentation. The FDEP issued a letter in August 1996 closing the enforcement case since the facility had closed down. Due to the lack of significant violations and/or discharges, this facility is assigned a <b>Low</b> risk.	<b>Low</b>
014	N/A	Concession Inc	8955 Palm River Rd, Tampa, FL 33619	Hillsborough	9102479	290 feet East	Former Petroleum USTs and Petroleum Contaminated Soil	This facility formerly contained three petroleum USTs (one 4,000-gallon leaded gas, one 2,000-gallon leaded gas, one 8,000-gallon diesel). The facility reported a petroleum discharge on May 2, 1991 after the removal of the USTs. Assessment and cleanup activities were subsequently conducted, and in December 1997 the facility received a No Further Action (NFA) letter from the FDEP. The site is currently occupied by a light industrial facility. No additional discharges have been reported. Due to the regulatory status of the facility, it is assigned a <b>Low</b> risk.	<b>Low</b>

**TABLE 1 - POTENTIAL CONTAMINATION SITES SUMMARY**

Site No.	Site ID. per ERIS Radius Report	Facility Name	Location/ Address	County	Facility ID	Distance from ROW	Potential Concern(s)	Site History and Potential Contamination Parameters	Risk Evaluation Rating
015	N/A	Philips Circuit Assemblies	203 Kelsey Ln Ste G, Tampa, FL 33619	Hillsborough	FLD982171639	250 feet East	Former RCRA SQG	This facility was formerly listed as a RCRA SQG which reportedly closed/moved as of 1993. Previous hazardous waste associated with this facility includes ignitable waste (D001), halogenated solvents (F001), spent halogenated solvents (F002), non-halogenated solvents (F003) and spent non-halogenated solvents (F005). No violations were reported for this facility at the time of this report. The facility currently operates as a radio and television broadcasting and wireless communications equipment manufacturing facility and is associated with a <b>Low</b> risk.	<b>Low</b>
016	N/A	UPS Inc. Logistics Americas SPL Kelsey	205 Kelsey Ln Ste D, Tampa, FL 33619	Hillsborough	FLR000254706	250 feet East	RCRA Generator	This facility is currently occupied by a distribution facility and is listed as a RCRA VSQG. Hazardous waste types associated with this facility include ignitable (D001) and corrosive (D002). There are no reported violations associated with this facility. As such, it is assigned a <b>Low</b> risk.	<b>Low</b>
017	N/A	Brace Integrated Services	8205 Adamo Dr, Tampa, FL 33619	Hillsborough	FLR000064345	230 feet Northeast	RCRA Generator	The facility is designated as a RCRA VSQG. Hazardous waste associated with FLR000064345 includes ignitable (D001), non-halogenated solvents (F003 and F005), 1-butanol and n-butyl alcohol (U031), benzene and cumene (U055), cyclohexanone (U057), and 2-butanone and methyl ethyl ketone (U159). No violations were identified for this facility. The facility currently operates as a scaffolding equipment and other specialty industrial services business and is assigned a <b>Low</b> risk.	<b>Low</b>
018	71	Alta Construction Equipment Florida, LLC	8418 Palm River Rd, Tampa, FL 33619	Hillsborough	FLR000088518	Adjacent West	RCRA Generator	This facility is listed as a RCRA Used Oil handler. Previous hazardous waste associated with this facility includes ignitable waste (D001). No violations were reported for this facility at the time of this report. This facility is occupied by a construction equipment supplier and is assigned a <b>Low</b> risk.	<b>Low</b>

**TABLE 1 - POTENTIAL CONTAMINATION SITES SUMMARY**

Site No.	Site ID. per ERIS Radius Report	Facility Name	Location/ Address	County	Facility ID	Distance from ROW	Potential Concern(s)	Site History and Potential Contamination Parameters	Risk Evaluation Rating
019	21, 22	Tampa Electric Co - Eastern Operation	820 S 78th Tampa, FL 33619	Hillsborough	8624802 ERIC_6659 ERIC_7392 ERIC_13816 FLD982174039	Adjacent Southwest	Petroleum ASTs, Petroleum USTs, Former Petroleum USTs, Engineering / Institutional Control, and documented Soil/Groundwater Impacts	<p>This facility is an active electric power operations center that currently contains one 2,000-gallon emergency generator diesel AST and three 10,000-gallon ASTs (unleaded gas, vehicular diesel, emergency generator diesel) which were installed between 1991 and 2022. Historically, this facility also contained twenty (20) USTs (leaded gas, unleaded gas vehicular diesel, emergency generator diesel, waste oil, new/lube oil) that were removed or closed in place from 1987 to 2018. The facility is also designated as a RCRA VSQG. Based on field reconnaissance, the site appears to contain fleet vehicle fueling areas.</p> <p>The facility reported eleven (11) petroleum discharges between 1986 and 2019. The facility has received regulatory closure for each of the previously reported discharges. The facility is located within Hillsborough County Property Appraiser Folio No. 044464-0000. The property/folio is registered with two Florida Institutional Controls Registry sites (IC-1166, IC-1438) in association with documented soil and groundwater contaminant impacts. The institutional controls place a restriction on groundwater usage for drinking or irrigation. It should be noted that, while the property/folio that is subject to the institutional controls lies adjacent to the project ROW, the extent of identified contaminant impacts appears to be located greater than 1,000 feet from the project ROW. It does not appear that contaminant impacts associated with this facility extend towards the project ROW. However, due to the project ROW lying adjacent to the property which is subject to the institutional control restrictions, additional measures may be required should dewatering or stormwater improvements be proposed. As such, this site represents a <b>Medium</b> risk.</p>	Medium
020	28	Hillsborough CNTY- Central Fleet Maintenance	410 S 78th St, Tampa, FL 33619	Hillsborough	8944190 110005634019 I-1995040538 FLR000014282 FLTMP9103174 49010SP	Adjacent West	Petroleum ASTs/USTs, Former Petroleum ASTs/USTs, RCRA Generator	<p>The facility is an active fleet management facility that currently contains one 3,000-gallon diesel AST that serves as an emergency generator and five (5) 12,000-gallon ASTs (unleaded gas and diesel fuel) for fueling operations that were installed in 2009. The facility also contains two (2) 500-gallon USTs that were installed in 1989 and are reportedly still in use. Historically, this facility contained three (3) 5,000-gallon ASTs that were removed in 2001 and seven (7) USTs that were removed or closed in place from 1999 to 2009. The facility reported six (6) petroleum discharges between October 1990, February 1995 (two discharges in the same month), May 1999, February 2006, and August 2007. The site received regulatory closure for each of the previously reported discharges. The facility address is also listed in the SPILLS database in association with a 25-gallon gasoline incident which occurred June 4, 2013. Based on the limited amount reported, no discharge was officially reported for this incident. The facility is also designated as a RCRA SQG with no outstanding violations. Due to the continued presence of registered storage tanks and the ongoing operation of this facility for fleet vehicle fueling and maintenance, this facility is assigned a <b>Medium</b> risk.</p>	Medium

**TABLE 1 - POTENTIAL CONTAMINATION SITES SUMMARY**

Site No.	Site ID. per ERS Radius Report	Facility Name	Location/ Address	County	Facility ID	Distance from ROW	Potential Concern(s)	Site History and Potential Contamination Parameters	Risk Evaluation Rating
021	N/A	Freightliner of Tampa/Hunt Truck Sales & Services Inc.	8211 Adamo Dr, Tampa, FL 33619	Hillsborough	8627317110002526874 FLD006924104	350 feet Northeast	Former registered storage tanks, active truck repair facility	This facility is a truck service and sales center. The facility historically contained two USTs (vehicular diesel, waste oil) and one AST (new/lube oil) that were removed between 1984 to 1987. The facility also contained two ASTs (waste oil, new/lube oil) that were removed between 2004 to 2008. Freightliner of Tampa reported four (4) petroleum discharges dated January 1992, September 1993, April 1999, and September 1999. The site received a SRCO in February 2007 for the reported discharges. No additional discharges have been reported. Hunt Truck Sales and Services Inc. was previously listed as a RCRA SQG. An inspection report dated September 2011 indicated that this RCRA facility is closed. An active truck repair area was observed during reconnaissance. Due to the facility having achieved regulatory closure for the past discharges, and given the lack of any subsequently reported discharges, this facility is assigned a <b>Low</b> risk.	Low
022	37 & 65	Former BP #00640177/ Chuck's Adamo Gulf Services	7749 Adamo Dr & 78th St, Tampa, FL 33619	Hillsborough	8624994 110070073320 FLG914686	100 feet Northwest	Former Petroleum USTs, Former Gas Station and Soil and Groundwater Petroleum Plume	Historically, this facility was occupied by a fuel service station and is currently occupied by a rental and sales facility for forklifts. This facility contained seven (7) USTs that have reportedly been removed. One petroleum discharge was reported on August 1988. The facility contains impacted soil and groundwater, the extent of which has yet to be fully defined, which may extend beyond the property boundary into the adjacent ROW to the east and/or north. MAS Environmental, LLC submitted a Low Scored Site Initiative (LSSI) Proposal in March 2022, which proposed additional soil and groundwater assessment to further evaluate the extent of petroleum impacts. Due to the documented petroleum impacts and the proximity of the site to the ROW, this facility is assigned a <b>High</b> risk.	High
023	39	Electro Bake Enterprises Inc	7748 Adamo Dr, Tampa, FL 33619	Hillsborough	8627281 110008317632 FL0001007178	250 feet Northwest	Former Petroleum USTs and Groundwater Petroleum Plume	This facility is occupied by a concrete machinery retailer that historically contained six (6) USTs that were removed in 1991. The facility is also designated as a RCRA Non-Generator. A petroleum discharge was reported in November 1987, with the latest assessment conducted in a Site Assessment Report, dated November 18, 2020. Assessment results identified a groundwater plume of dissolved hydrocarbons. The extent of the plume appears to straddle the Adamo Drive ROW. Offsite monitoring wells did not indicate any contaminant exceedances in the direction of the project corridor ROW, located approximately 250 feet away. Due to the documented groundwater contaminant plume and its distance from the project ROW, this facility is assigned a <b>Medium</b> risk.	Medium

**TABLE 1 - POTENTIAL CONTAMINATION SITES SUMMARY**

Site No.	Site ID. per ERIS Radius Report	Facility Name	Location/ Address	County	Facility ID	Distance from ROW	Potential Concern(s)	Site History and Potential Contamination Parameters	Risk Evaluation Rating
024	64, 66	Hall Mack Sales Cralle	7810 Adamo Dr, Tampa, FL 33619	Hillsborough	110002530495, 9100431, FLD041496068, 46626SP, 9046128	250 feet North	Former Petroleum USTs and RCRA Non-Generator	This facility currently operates as a truck sales and service center. Two registered storage tank facility numbers are listed for this address: 9100431 and 9046128. These listings are associated with four (4) USTs (waste oil, new/lube oil) that were removed in 1989. Two petroleum discharges were reported for the 9100431 facility between September 1990 and December 1992. Both discharges received regulatory closure in the form of a SRCO from FDEP in February 1997. The facility address is also listed in the SPILLS database in association with a 15-gallon diesel fuel incident which occurred February 13, 2012. No discharge was officially reported for this incident. The facility is also designated as a RCRA Non-Generator. An auto repair building was observed during site reconnaissance. Due to the facility having achieved regulatory closure for the past discharges, and given the lack of any subsequently reported discharges, this facility is assigned a <b>Low</b> risk.	<b>Low</b>
025	41	Southwest FL Water MGMT Dist. - S-160	78th St & Adamo Dr, Tampa, FL 33610	Hillsborough	9401239	430 feet North	Former Petroleum UST	This facility historically contained one, 280-gallon unleaded gas UST that was removed from the site in September 1994. The former UST appears to have been associated with a control house structure. No discharges have been reported for this facility. The site is listed as a state government facility and is assigned a <b>Low</b> risk due to the lack of any reported discharges.	<b>Low</b>
026	35	Florida Lift Systems	115 78th St S, Tampa, FL 33619	Hillsborough	FLD981750383	Adjacent North	RCRA Generator	This site is occupied by a forklift repair shop and became a registered hazardous waste generator in 1986. The facility is currently listed as a RCRA VSQG. Site photos uploaded by the FDEP in 2011 indicate that the facility was equipped with an oil/water separator, a used oil AST and parts washers. An inspection on June 30, 2011 indicated that the facility was not operating in-compliance, and reportedly returned to compliance in August 2011. No additional violations have been reported. Based on the status of the facility, it is assigned a <b>Low</b> risk.	<b>Low</b>
027	19, 63	Aquatech Manufacturing LLC/Biotec Films LLC	7455 E Adamo Dr, Tampa, FL 33619	Hillsborough	110027951483 FLR000129833 FLT 050076413	Adjacent North	RCRA Generator	This facility is designated as a RCRA VSQG, with no reported violations. Hazardous waste associated with this facility includes ignitable waste (D001), corrosive waste (D002), lead (D008), nicotine and salts (P075), and pyridine, 3-(1-methyl-2-pyrrolidinyl)-, (s)-, and salts (P075). Site reconnaissance was limited due to a private road leading to the site. The facility currently operates as a flavoring syrup and concentrate manufacturing facility and is associated with a <b>Low</b> risk.	<b>Low</b>

028	15, 17, & 61	United Rentals Branch A33 / 667	7233 E Adamo Dr, Tampa, FL 33619	Hillsborough	9046996 50060SP 60816SP	Adjacent North	Oil and Unleaded Gas ASTs and Former Petroleum USTs	This facility is occupied by an equipment rental agency that currently contains one 2,000-gallon unleaded gas AST and one 733-gallon new/lube oil AST that were installed in 2007. The facility historically contained six (6) USTs that were removed from 1986 to 2005. The facility reported four (4) petroleum discharges during the following time periods: September 1992, November 1992, September 1997, and March 2005. The site received regulatory closure for each of the reported discharges. The facility address is also listed in the SPILLS database in association with a 60-gallon diesel fuel incident (vehicle accident) which occurred November 26, 2013. No discharge was officially reported for this incident. An inspection conducted in July 2022 resulted in a major out of compliance status due to a malfunctioning diesel gauge. This violation was corrected and closed in August 2022. Based on the regulatory status of the facility and the lack of additional reported discharges, this site is assigned a <b>Low</b> risk.	<b>Low</b>
029	10, 11, 14, 60	Phil Reed Equipment Co/Certified Spring Brake & Steering/South Florida Tank Wash Inc / Quality Carriers Inc. / Lazer Tank Lines, Inc.	7015 Adamo Dr/7015A Adamo Dr #60/7017 Adamo Dr, Tampa, FL 33619	Hillsborough	8943873 110005662880 110005990115 110005656995 FL0001000603 FLR000067314 FLR000057414 49935	Adjacent North	Oil ASTs, Former Diesel AST and RCRA Generator	This site contains a trucking and equipment company. The Phil Reed Equipment Co. facility currently contains one 500-gallon new/lube oil AST and one 250-gallon waste oil AST. The site was historically associated with one 12,000-gallon diesel AST that was removed in 1993. No discharges have been reported in association with this facility. The site is also listed in association with a RCRA SQG and a RCRA Non-Generator facility. The site address is also listed in the SPILLS database in association with a complaint regarding caustic soda and resin which occurred October 7, 2013. No discharge was officially reported for this incident. No features of concern were observed during field reconnaissance. The site is assigned a <b>Low</b> risk.	<b>Low</b>
030	NA	3 Flags	6807 Adamo Dr, Tampa, FL 33619	Hillsborough	FLD004113197	Adjacent North	Former RCRA SQG	This facility was designated as a RCRA SQG in 1986 in association with ignitable waste (D001) and spent solvents (F001). FDEP conducted an inspection in March 2010 which noted that the facility was closed and vacant at that time. No features of concern were observed during reconnaissance. No violations were reported for this facility. As such, it is assigned a <b>Low</b> risk.	<b>Low</b>

**TABLE 1 - POTENTIAL CONTAMINATION SITES SUMMARY**

Site No.	Site ID. per ERIS Radius Report	Facility Name	Location/ Address	County	Facility ID	Distance from ROW	Potential Concern(s)	Site History and Potential Contamination Parameters	Risk Evaluation Rating
031	4, 5, 7, 9, 59	Mantua Manufacturing Company	6911 Adamo Dr, Tampa, FL 33619	Hillsborough	ERIC_7618, ERIC_13732, COM_68398, 8733894, FLD984182303	Adjacent North	Former Petroleum UST and RCRA Generator	This facility is occupied by a household furniture manufacturer that has been in operation since 1972. As part of operations, the facility formerly maintained one 500-gallon UST which was initially used to store mineral spirits, and later used to store 1,1,1-trichloroethane. The UST was removed in 1992. At that time, a closure assessment was conducted which documented petroleum and chlorinated solvent compounds in soil and groundwater, in the vicinity of the UST. Subsequent assessment and remedial activities were conducted during the 1990s, 2000s, and 2010s. The work culminated in a Natural Attenuation Monitoring (NAM) program, which concluded in 2018 after it was determined that the site met the criteria for No Further Action (NFA) with Conditions (RMO III) per Chapter 62-780.680, FAC. The latest soil data indicated that no contaminant impacts remain above the applicable SCTLs. Groundwater impacts (vinyl chloride, chloroethane, 1,1 DCE, 1,1 DCA, 1,1,1 trichloroethane, trichloroethene, and methylene chloride) remain on-site and are subject to institutional controls in the form of restrictions placed on groundwater use, dewatering, and stormwater features. Declarations of restrictive covenants (DRC) were recorded for 3 adjoining properties where groundwater impacts remained. These properties are located at 6815 (Friedman Parcel), 6905 (JRS Parcel), and 6915 E. Adamo Drive (Levant Parcel). The facility was issued a Conditional SRCO from FDEP in July 2020. Based on the latest assessment data, it appears the extent of existing groundwater impacts lies approximately 125 feet north of the project ROW. Based on the proximity to the documented contaminant plume and the institutional control restrictions in place for these adjacent parcels, this site is assigned a <b>Medium</b> risk.	<b>Medium</b>
032	55	Factory Direct Inc	6601 E Adamo Dr, Tampa, FL 33619	Hillsborough	FLR000176313	Adjacent North	RCRA Generator	This facility is designated as a RCRA SQG. Hazardous waste associated with this facility includes ignitable waste (D001), corrosive waste (D002), and lead (D008). According to the most recent inspection report available on OCULUS, dated February 29, 2012, the facility was cited for several compliance violations which were remedied at the time and the facility returned to compliance. At that time, the facility was operating as an industrial battery repair and sales facility. No subsequent violations or inspection reports were identified. The facility is currently occupied by an industrial equipment supplier and is associated with a <b>Low</b> risk.	<b>Low</b>
033	N/A	Stuart Diesel Service	6515 Adamo Dr, Tampa, FL 33619	Hillsborough	8625307 FLD076785880	220 feet North	Former Petroleum UST and RCRA Generator	This facility was historically associated with one 2,000-gallon unleaded gas UST that was removed in 1991. The facility reported one petroleum discharge in December 1990. In October 1992 the Site Rehabilitation Completion Report (SRCR) was submitted and the discharge received regulatory closure in November 1992. No additional discharges have been reported. No features of concern were observed during reconnaissance. The facility is also designated as a closed, former RCRA SQG. Based on the regulatory status of this facility, it is assigned a <b>Low</b> risk.	<b>Low</b>

**TABLE 1 - POTENTIAL CONTAMINATION SITES SUMMARY**

Site No.	Site ID. per ERIS Radius Report	Facility Name	Location/ Address	County	Facility ID	Distance from ROW	Potential Concern(s)	Site History and Potential Contamination Parameters	Risk Evaluation Rating
034	N/A	Craft Used Equipment	6805 Adamo Dr, Tampa, FL 33619	Hillsborough	8624989	Adjacent North	Former Petroleum UST	This facility is currently occupied by an adult entertainment facility that historically contained one 2,000-gallon leaded gasoline UST that was removed in 1990. During tank removal activities, screening of soils indicated a petroleum discharge had occurred and a Discharge Report Form (DRF) was submitted. In June 1992, the facility entered the Abandoned Tank Restoration Program (ATRP) and was issued a cleanup priority score of 10. The project sat idle for several years, until 2015 when soil and groundwater sampling was conducted which identified petroleum constituents in exceedance of the SCTLs and GCTLs. Additional soil and groundwater sampling was subsequently conducted from 2018 through 2023. According to the Supplemental Site Assessment Report (SSAR), dated July 2023, no contaminants of concern were identified in soil or groundwater samples above the applicable CTLs. According to a letter issued by EPC on August 9, 2023, the site meets the criteria for site closure through Risk Management Option I (RMO I). The site is awaiting the issuance of the NFA/SRCO pending the completion of well abandonment activities. Based on the latest assessment data, it does not appear that contaminant impacts are present that could impact the proposed project. As such, the facility is assigned a <b>Low</b> risk.	Low
035	56	Craft Equipment Co	6801 Adamo Dr, Tampa, FL 33619	Hillsborough	9601860 FLR000158337	Adjacent North	Former Petroleum AST, RCRA Generator	This facility is a materials handling equipment distributor which previously contained one (1) 2,000-gallon unleaded gas AST that was reportedly removed in 1996. No tank closure documentation was available on OCULUS. The facility is also listed as a RCRA SQG. The most recent inspection report, dated February 2013, noted areas of minor staining throughout the equipment storage yard, which were resolved at the time of inspection. There have been no discharges reported for this facility. Based on the lack of reported discharges, this facility is assigned a <b>Low</b> risk.	Low
036	53	Rental Service Corp #616/Prime Equipment #616	5907 E Adamo Dr, Tampa, FL 33619	Hillsborough	8628829AST 8628829 110005625822 8628829LUAST FLD984260554 8628829UST	407 feet North	Former Petroleum ASTs, Former Petroleum USTs and Petroleum Groundwater Plume	This facility historically contained one 1,500-gallon unleaded gas AST and one 560-gallon unleaded gas AST. The 560-gallon AST was reclassified to nonregulated/de-minimis in 2009, and the 1,500-gallon AST was removed in 2014. This facility also contained five (5) USTs that were removed from the site between 1989 and 1998. During a storage tank upgrade at the facility in October 1988, approximately 2 inches of free product in two southern monitor wells was identified. This facility was accepted into the Early Detection Incentive (EDI) program on December 13, 1989. Groundwater data collected in July 2023 identified petroleum impacted groundwater in several monitoring wells. The facility is also designated as an inactive RCRA Non-Generator. The facility appeared to be vacant at the time of site reconnaissance and no features of concern were observed. Based on the documented groundwater contamination and unknown extent of the plume, this facility is assigned a <b>High</b> risk.	High

Site No.	Site ID. per ERIS Radius Report	Facility Name	Location/ Address	County	Facility ID	Distance from ROW	Potential Concern(s)	Site History and Potential Contamination Parameters	Risk Evaluation Rating
037	2, 6, & 52	Herc Rentals 9368/Hertz Equipment	5725 E Adamo Dr, Tampa, FL 33619	Hillsborough	8627244AST 110005610516 456 8627244LUA ST FLD984218537 8627244UST	Target Property	Petroleum ASTs, Former Petroleum USTs, Engineering Control and Metal and Hydrocarbons Soil and Groundwater Exceedance	The facility historically contained seven (7) USTs, five (5) that were removed in 1989 and 2008, and two (2) 10,000-gallon tanks that were reportedly abandoned in place. This facility currently operates one 6,000-gallon diesel AST and one 1,000-gallon unleaded gasoline AST that were installed in 2008. Three (3) petroleum discharges were reported in November 1989 (two recorded discharges on the same date) and June 2005. The most recent sampling event conducted in January 2014 identified arsenic and petroleum impacted soil and groundwater. A Declaration of Restrictive Covenant (DRC) was approved December 22, 2014, restricting the use of groundwater at the site and requiring the use of engineering and institutional controls to cap contaminated soils. The most recently available routine storage tank inspection conducted on February 15, 2023 indicated that the facility is currently out of compliance with minor violations associated with inadequate exterior coating protections, inaccessibility of spill containment, dispenser lines, dispenser pumps, the lack of removal of water and regulated substances, and missing annual operability testing results. The facility has not returned to compliance as of the date of this report. The facility is also designated as a RCRA SQG with no recorded violations over the past 12 quarters. Two ASTs were observed during site reconnaissance. No evidence of a release was observed. Although the property is currently subject to institutional and engineering controls for existing soil and groundwater contamination, the previous assessment data identified that the contaminant impacts are located greater than 225 feet from the project ROW. The proposed project does not involve ROW acquisition or construction in areas outside existing ROW. Therefore, this facility is assigned a <b>Medium</b> risk.	Medium
038	1	SWFWMD Bypass Canal Landfill	Palm River/Maydell Dr. & Crosstown Expwy, Tampa, FL 33619	Hillsborough	65047 COM_65047 ERIC_13685	Target Property	Historic Landfill, Two Declaration of Restrictive Covenants, Benzene, Leachate, and PCB impacted Soil & GW	Contamination associated with the Tampa Bypass Canal Landfill resulted from a discharge from historical landfill activities. Contaminants of concern consist of benzene and PCBs in groundwater and buried landfill debris. A Contamination Assessment Report (CAR) was completed by Geraghty & Miller, Inc. for this property in September 1996. Based on the findings of this report, additional site assessment activities were completed over the next several years, and a Remedial Action Plan (RAP) was prepared by the Southwest Florida Water Management District (SWFWMD) on September 23, 1999 pursuant to a FDEP CAR approval letter dated May 13, 1999 which was issued under the guidance of a Stipulated Agreement (OGC Case No. 94-2520). Additional assessment was conducted under the provisions of the RAP, and a Site Rehabilitation Completion Report (SRCR) was submitted on January 18, 2013. A Conditional Site Rehabilitation Completion Order (CSRCO) was issued by FDEP on August 18, 2020. Contaminated groundwater and buried landfill debris remain onsite, and have been addressed via two Declaration of Restrictive Covenants which prevent groundwater use and require institutional and engineering controls for this facility. Four monitoring wells were observed during site reconnaissance. Based on the presence of	High

								buried landfill debris and documented groundwater contamination, this site is assigned a <b>High</b> risk.	
039	N/A	United Rentals Branch 667	5711 Adamo Dr, Tampa, FL 33619	Hillsborough	9802836	232 feet North	Petroleum AST	This facility currently operates one 2,000-gallon diesel AST that was installed December 1999. A compliance inspection conducted in July 2022 identified a minor out of compliance violation associated with missing overfill device inspection records. This violation was corrected and the facility returned to compliance in February 2023. No reported discharges have been identified with this facility. The AST appeared in good condition during site reconnaissance, with no evidence of a release observed. Based on the current regulatory status, and lacking any reported discharges, this facility is assigned a <b>Low</b> risk.	Low
040	51	C&M Engine Services Inc/Utility Battery Company	5621 Adamo Dr, Tampa, FL 33619	Hillsborough	110066946791 110005632574 FLR000010876FLN000409761	Adjacent North	RCRA Generator	This facility is listed as the Utility Battery Company, with an address that is located miles away from the project corridor. This facility is currently occupied by the C&M Engine Services which operates as a marine and industrial engine repair business, which generates used oil and other automotive related wastes. As such, it is listed as a RCRA VSQG. The latest compliance inspection indicated that this facility is in compliance. No features of concern were identified during reconnaissance. Based on the status of the facility, it is assigned a <b>Low</b> risk.	Low
041	N/A	Clean Harbors of Kingston Inc	5615 Adamo Dr, Tampa, FL 33619	Hillsborough	110005590164 FLD982164220	Adjacent North	RCRA Generator	This facility was not listed in the ERIS database, but was identified in the FDEP Map Direct and EPA ECHO databases as an inactive RCRA facility. No compliance violations were noted. The facility currently operates as Tudi Mechanical Systems, and no features of concern were identified during site reconnaissance. The facility is assigned <b>No</b> risk.	No Risk
042	N/A	Tampa Tank & Welding Inc.	5205 E Adamo Dr, Tampa, FL33619	Hillsborough	8625564 FLD982088007	Adjacent North	Former Petroleum ASTs and RCRA Generator	This facility is currently a fabricated structural metal manufacturer that was historically associated with two (2) 1,000-gallon diesel USTs that were removed in 2010 and at a nondisclosed date. No tank closure reports were available for review on the FDEP OCULUS database. A January 2007 inspection report indicated the facility was issued a minor compliance violation for not notifying EPC prior to tank closure. No discharges have been reported for this facility. The facility is also listed as a RCRA SQG. The facility received notice of compliance violations following a February 2017 inspection, after which the facility entered into a Consent Order (File No. 17-1082) with FDEP in December 2017 to resolve the compliance issues. The enforcement case was deemed closed in January 2018. Based on the regulatory status of the facility, it is assigned a <b>Low</b> risk.	Low

**TABLE 1 - POTENTIAL CONTAMINATION SITES SUMMARY**

Site No.	Site ID. per ERIS Radius Report	Facility Name	Location/ Address	County	Facility ID	Distance from ROW	Potential Concern(s)	Site History and Potential Contamination Parameters	Risk Evaluation Rating
043	26	Marathon-Selmon #739	410 S 50th St, Tampa, FL 33619	Hillsborough	9802985	400 feet South	Petroleum USTs and Gas Station	This facility is currently operating as a gas station that contains one 15,000 gallon UST and two 12,000 gallon USTs that were installed in 2000. The most recently available compliance inspection report conducted in May 2023 resulted in a minor compliance violation due to a STP head component in need of repair/replacement. A letter from Hillsborough County EPC dated June 21, 2023 indicated that the facility had returned to compliance. No discharges have been reported for this facility. Due to its ongoing operation as a gas station, this facility is assigned with a <b>Medium</b> risk.	<b>Medium</b>
044	20	Zimek Technologies LLC	251 78th Street, Tampa, FL	Hillsborough	FRS: 110038260609	240ft south	Pesticide production	This facility historically operated as a registered pesticide producer and has a FINDS/FRS listing as a business that is subject to environmental regulations. No reported discharges were identified in association with this facility. Bonded Lightning Protection currently operates at this address and is not a registered pesticide producer. Based on the current regulatory status, and current business operations, this facility is assigned <b>No</b> risk.	<b>No Risk</b>
045A	34	Florida Rock & Tank Lines	50th St & Crosstown Expressway, Tampa, FL 33605	Hillsborough	110035561861 9805577 FLT030072128 FLT030072136 9401649	Target Property	Tanker Spill	On March 31, 2003, a Florida Rock & Tank Lines, Inc. (FRTL) tanker truck overturned while turning northward from the eastbound exit ramp of the Selmon Expressway. Approximately 4,000 gallons of unleaded gasoline were released during the incident, which traveled into a storm sewer and into a small pond south of the expressway's eastbound entrance ramp. Some fuel also flowed to the south side of the ramp. Cleanup activities were immediately initiated, which included excavation of approximately 227.42 tons of impacted soil and pumping of 16,950 gallons of impacted water from the small pond. Subsequent site assessment work was conducted over the subsequent years. A SRCO was issued by FDEP on March 5, 2008. No features of concern were identified during site reconnaissance. Based on the current regulatory status, this incident is assigned a <b>Low</b> risk.	<b>Low</b>
045B	13 & 40	FDOT Crosstown Exp	50th St. and Crosstown Expressway westbound entry ramp, Tampa, FL 33619	Hillsborough	9401651LUAST 39542SP 49897SP 9401651UST	Target Property	Former Petroleum UST Soil Contamination	A petroleum discharge was reported in December 1998 that was associated with the removal of a 275 gallon UST. Source removal activities were conducted in September 1999. Subsequently, site assessment activities were completed and the FDEP issued a NFA status in February 2000. No features of concern were identified during site reconnaissance. Based on the current regulatory status, this incident is assigned a <b>Low</b> risk.	<b>Low</b>
046	38	Speedway #6911/Rebel #865	5149 Adamo Dr, Tampa, FL 33619	Hillsborough	9812105	200 feet North	Petroleum USTs and Operating Gas Station	This facility is currently occupied by a Rebel/Exxon gas station that currently operates three (3) 20,000 gallon unleaded gas USTs that were installed in 2010. Several compliance issues were noted during a compliance inspection in August 2022. As of the date of this report, the facility has not returned to compliance. No discharges have been reported for this facility. Due to its ongoing operation as a gas station, this facility is assigned with a <b>Medium</b> risk.	<b>Medium</b>

**TABLE 1 - POTENTIAL CONTAMINATION SITES SUMMARY**

Site No.	Site ID. per ERIS Radius Report	Facility Name	Location/ Address	County	Facility ID	Distance from ROW	Potential Concern(s)	Site History and Potential Contamination Parameters	Risk Evaluation Rating
047	43	Adamo Shell/Circle K Store #2709907	5100 E Adamo Dr, Tampa, FL 33619	Hillsborough	8625086 110033013432	475 feet North	Petroleum UST, Former Petroleum USTs, Operating Gas Station, Soil and Groundwater Petroleum Contamination	This facility is currently occupied by a Shell gas station that historically contained three (3) 9,520 gallon unleaded gas USTs that were replaced with one 30,000 gallon unleaded gas UST that was installed in 2010. Three (3) petroleum discharges were reported between January 1992 and February 2006. One of the discharges received a No Cleanup Required status from the EPC. Site assessment activities are ongoing for the other discharges. Site assessment data has identified soil and groundwater impacts that warrant further investigation. Groundwater impacts are located approximately 520 feet from the project ROW. The facility appeared to be closed for remodeling/construction during site reconnaissance. Based on the documented contaminant plume from the project ROW and ongoing fueling operations, this facility is assigned a <b>Medium</b> risk.	<b>Medium</b>
048	N/A	Chevron #48104	4990 E Adamo Dr, Tampa, FL 33605	Hillsborough	8625358	480 feet North	Former Petroleum USTs, Former Gas Station, Soil and Groundwater Petroleum Contamination	Historically, this facility was occupied by a gas station that contained one 550 gallon UST and three 10,000 gallon USTs that were removed in 1991. The facility reported a petroleum discharge in May 1988. Site assessment data from December 2022 did not identify soil or groundwater data exceeding the applicable Cleanup Target Levels. The facility received a Provisional No Further Action Proposal Approval from FDEP on January 27, 2023, in which a SRCO would be issued pending the abandonment of existing monitoring wells. Final issuance of the SRCO is still pending. The site is currently occupied by T.A. Mahoney Company, a marine/boat/fishing supply store. No features of concern were observed during reconnaissance. Based on the pending regulatory status of the facility and discontinuation of fueling operations, this facility is assigned a <b>Low</b> risk.	<b>Low</b>
049	24	Engine Lab of Tampa	201 S. 78th Street, Tampa, FL	Hillsborough	FLR000088823	100 ft south	Engine remanufacturer	This facility historically operated as an automobile and small truck engine remanufacturer that began operations in May 2000. During a compliance inspection in May 2002, the property was reported to contain multiple parts cleaners and 55-gallon drums of used oil. Additionally, the facility was issued an administrative violation that was subsequently corrected in November 2002. The facility currently operates as Big 3 Diesel & Automotive Repair. No reported discharges have been identified for either facility. No features of concern were observed during site reconnaissance. Lacking any reported discharges, this site represents a <b>Low</b> risk.	<b>Low</b>
050A	67	Intertek Testing Services Caleb Brett	4951 Adamo Dr Ste 130, Tampa, FL 33605	Hillsborough	110005586909 110005592055 FLD982146862 Fld982173718	148 feet North	RCRA Generator	This facility is listed in the following databases: ECHOR04, FRSFL, and RCRAGR04. The facility is designated as an active RCRA VSQG (EPA ID#: FLD982146862) and a RCRA Non-Generator (EPA ID#: FLD982173718). Hazardous waste associated with FLD982146862 includes ignitable waste (D001), corrosive waste (D002), and spent halogenated solvents (F002); and hazardous waste associated with FLD9821 73718 include ignitable waste and spent non-halogenated solvents (F003). No reported violations were identified over the past 12 quarters. The facility currently operates as Lighting Laboratory Services. No features of concern were identified during site reconnaissance. Based on the current facility status as a RCRA VSQG, and lacking any violations, this facility is assigned a <b>Low</b> risk.	<b>Low</b>

**TABLE 1 - POTENTIAL CONTAMINATION SITES SUMMARY**

Site No.	Site ID. per ERIS Radius Report	Facility Name	Location/ Address	County	Facility ID	Distance from ROW	Potential Concern(s)	Site History and Potential Contamination Parameters	Risk Evaluation Rating
050B	67	SGS Control Services Inc	4951 Adamo Dr Ste 210, Tampa, FL 33605	Hillsborough	Fld982173718	148 feet north	RCRA	This facility was listed as a small quantity generator of hazardous waste in 1989, and was listed as a non-generator in 2002. The current RCRA generator status is inactive, and the facility currently operates as Paragon. No features of concern were observed during reconnaissance. Based on the inactive generator status, and lacking any violations, this facility is assigned <b>No</b> risk.	No Risk
051	27 & 31	Manheim Tampa DBA Greater Tampa Bay Auto Auction	401 S 50th St, Tampa, FL 36619	Hillsborough	1002101 9046200AST 110035649947 110041174154 FLD982135998 43389SP	407 feet South	Petroleum AST and Former Oil AST	This active automotive repair and maintenance shop historically contained one 575 gallon AST that was removed and one active 1,000 gallon AST that was installed in 1990, which is located more than 1,700 feet south of the ROW. The facility is also designated as a RCRA SQG. There are no compliance violations or discharges identified in association with this facility. Hazardous wastes associated with this facility includes ignitable waste (D001) and spent halogenated solvents (F003). Based on the current regulatory status, and lacking any records of violations or discharges, this facility is assigned a <b>Low</b> risk.	Low
052	69	Pro Lite Services Inc	4901 Adamo Dr Unit E50, Tampa, FL 33605	Hillsborough	110017877127 FLR00108985	Target Property	RCRA Generator	Pro Lite Services operated as a universal waste disposer and was registered as a RCRA VSQG. An inspection conducted in November 2004 identified that 20 gallons of crushed mercury containing debris was improperly disposed. Review of a FDEP comment letter dated December 13, 2004 indicated that the Pro Lite Services ceased operations and moved out of state, but that the storage facility property disposed of the universal waste lamps and provided disposal receipts to the department. The letter further stated that the enforcement action was closed at that time. The site is currently occupied by a self-storage facility and no features of concern were observed during site reconnaissance. Based on the current regulatory status, this facility is assigned a <b>Low</b> risk.	Low
053	70, 72	Rinaldi Printing Company	4514 Adamo Drive, Tampa, FL 33605	Hillsborough	1205701017 110001412837 FLD004093928	490 feet North	RCRA Generator	This facility is a commercial printer that is listed as a RCRA VSQG. Hazardous waste associated with this facility includes ignitable waste (D001). A compliance inspection was conducted in November 2011 in which potential compliance issues were identified but were resolved at that time. The facility is also listed in the Air Facility System (AFS) database in association with an Air General Permit from FDEP. No violations were identified within the last 12 quarters. The facility currently operates as Rinaldi Printing and Packaging. No features of concern were observed during reconnaissance. Based on the current regulatory status, and lacking any violations, this facility is assigned a <b>Low</b> Risk.	Low
054	77, 78	Davies Can Company / Thompson Center Adamo	4502 Adamo Dr / 45th St & Adamo Dr, Tampa, FL 33605	Hillsborough	FLD984169938 8732842	250 feet North	Former RCRA Generator, Former Petroleum UST	The Thompson Center Adamo facility reported a petroleum discharge associated with the removal of one 3,300 gallon UST in 1987. Site assessment activities were complete and the FDEP issued a No Further Action approval in March 1988. The Davies Can Company facility, at the same location, was formerly listed as a RCRA SQG. This facility currently operates as ABC Supply Co. Inc. No features of concern were observed during reconnaissance. Based on the regulatory status of this facility, it is assigned a <b>Low</b> risk.	Low

**TABLE 1 - POTENTIAL CONTAMINATION SITES SUMMARY**

Site No.	Site ID. per ERIS Radius Report	Facility Name	Location/ Address	County	Facility ID	Distance from ROW	Potential Concern(s)	Site History and Potential Contamination Parameters	Risk Evaluation Rating
055	79, 81	Central FL Pipeline Spill	NE Corner HWY 60 & 45th St, Tampa, FL 33605	Hillsborough	9804391 12404	160 feet North	Previously reported petroleum discharge	This facility reported a petroleum discharge in August 2001 stemming from a release from a 10-inch underground diesel fuel pipeline, which runs along the north side of Adamo Drive within the ROW. The facility received a SRCO from FDEP in January 2004 for the reported discharge. No features of concern were observed during reconnaissance. Based on the current regulatory status of this facility, it is assigned a <b>Low</b> risk.	<b>Low</b>
056	65	Merit Fasteners	7501 Adamo Dr, Tampa, FL 33619	Hillsborough	110012581768 FLR000079145	150 feet North	RCRA Non-Generator	The facility is listed as a RCRA Non-Generator. Hazardous waste associated with this facility includes ignitable waste (D001). The site is currently occupied with a quartz and granite countertop wholesaler. No features of concern were observed during site reconnaissance. No records of violations or discharges were identified in association with this facility. As such, it is assigned a <b>Low</b> Risk.	<b>Low</b>
057	96, 97	FL Dept of Transportation Crosstown Exp	39th St Westbound Entry Ramp, Tampa, FL 33619	Hillsborough	9401655	Within existing ROW north of Selmon Exp	Former Registered UST, Petroleum Discharge	A petroleum discharge was reported at this facility in September 1994. During site assessment, a 275-gallon emergency generator diesel UST was removed in 1998. Site assessment activities were complete and the FDEP issued a "No Cleanup Required" (NREQ) determination in May 2001. No assessment, cleanup or closure records for the reported discharge were available for review. This site was observed to be redeveloped into a stormwater retention pond, and no features of concern were observed during reconnaissance. Based on the regulatory status and subsequent development into a stormwater pond, this facility is assigned a <b>Low</b> risk.	<b>Low</b>
058	90, 91, 94, 95	Radiant Group 04-4C-0202	Adamo Drive & 39th St, Tampa, FL 33605/SR 60 @39th St, Tampa, FL 33605	Hillsborough	9806823 55376 35268	Within existing ROW north of Selmon Exp	Petroleum Discharge	This facility reported a petroleum discharge in May 2004 in response to a documented spill within the existing ROW, at the intersection of 39th Street and Adamo Drive. An SRCO was issued by FDEP in April 2007 for this discharge. A spill of 100 gallons of water-based paint from a vehicle accident was reported in May 2016. The incident status is listed as "Saved". No cleanup requirements or additional documentation was readily available. This site currently consists of vegetated land and electrical meters, with no features of concern observed during the site reconnaissance. Based on the nature of the material reportedly spilled and current regulatory status of this facility, it is assigned a <b>Low</b> risk.	<b>Low</b>
059	N/A	Refurbished Office Furniture Inc	1212 N 39th St #200, Tampa, FL 33605	Hillsborough	FLR000100875	275 feet North	RCRA Generator	The FDEP's Map Direct database identified this facility as a RCRA SQG. Hazardous waste associated with the facility includes ignitable waste (D001) and spent non-halogenated solvents (F003). Historically, this facility received RCRA violations that has all achieved compliance. There were no reported violations identified over the past 12 quarters. No features of concern were observed during the site reconnaissance. Based on the regulatory status of this facility, it is assigned a <b>Low</b> risk.	<b>Low</b>

**TABLE 1 - POTENTIAL CONTAMINATION SITES SUMMARY**

060	101, 104, & 123	Brenntag Mid-South, Inc./Industrial Chemical Supply/HCI Industrial Chemical & Supply Company	3520 Adamo Drive, Tampa FL 33607	Hillsborough	1065850 8627237AST FLD032783003 311966 8627232 COM_311966 ERIC_13987 04-1997-0513 110012141869 532156 I-1991090588 710952 I-1999081020 I-1999091165 I- 2000040182 8627232LUAST 19900417A40022 FLD032783003 9365- FL-1 33605HCNDL3520A 8627232UST	48 feet North	Sodium, Arsenic, and Lead Impacted GW, Two AST Tank Farms	This facility reported a petroleum discharge associated with a UST in December 1988, when the site was occupied by Industrial Chemical Supply Co. This UST was closed in place in 1989. Tank closure documentation was not readily available; however, An email from Hillsborough County EPC dated September 13, 2013 indicated that a soil sample was taken and was clean and indicated no proof of contamination. This facility currently operates as Brenntag Mid-South, Inc. and is a bulk chemical distribution facility and contains two tank farms, an office building, railroad spur tracks, paved parking areas, and paved surfaces within operational areas. This facility consists of two separate tank farm areas and contains various regulated and unregulated ASTs of various sizes and contents including, but not limited to, polyethylene, sulfuric acid, hydrogen peroxide, and sodium hydroxide. The facility was inspected by the FDEP Hazardous Waste Program and Wastewater Program departments and the Hillsborough County Environmental Protection Commission (HCEPC) in 2009, and several violations were identified. Brenntag entered into a Consent Order with the FDEP in March of 2010. A Limited Site Assessment Report (LSAR) was completed by Arcadis in January 2010 which identified pH impacts in soils. Brenntag entered into a Consent Order with the FDEP in March of 2010. Subsequent site assessment activities identified the primary COCs in soil and/or groundwater as including arsenic, lead, and sodium (the bulk of the COC mass is located within the upper surficial aquifer). An approved RAP has been issued for the site and is being actively remediated via groundwater extraction and MNA. The most recent compliance inspection report for the USTs (completed in 2015) indicated that the facility was in compliance. In August 2021, a release of approximately 6,000 gallons of hydrochloric acid was spilled onto the land surface. Additional monitoring wells were installed, and the NAM program was revised to incorporate the newly installed wells. The most recent Semiannual Status Update Report prepared by Arcadis in August 2023 revealed the primary COCs in groundwater continue to consist of arsenic, lead, and sodium. During the site reconnaissance, numerous 55-gallon drums, caged totes, and ASTs (with capacities ≤18,000-gallons) were observed. Based on the documented groundwater contamination and ongoing chemical distribution activities, this site is assigned a <b>High</b> risk.	<b>High</b>

**TABLE 1 - POTENTIAL CONTAMINATION SITES SUMMARY**

Site No.	Site ID. per ERIS Radius Report	Facility Name	Location/ Address	County	Facility ID	Distance from ROW	Potential Concern(s)	Site History and Potential Contamination Parameters	Risk Evaluation Rating
061	103, 109, 114, 122	Sol Walker & Co / Meta Property	1110 35th Street / 1111 N 34th Street, Tampa, FL 33605	Hillsborough	651368625371COM_65136ERIC_13708	120 feet North	Former Petroleum UST and PCB Soil Contamination; engineering controls	This site is divided into a north and south portion by a CSX railroad right of way. The southern portion (1110 N 35th St), known as Main Yard Property, located approximately 120 feet north of the project corridor across E Adamo Drive, historically served as a rail yard for CSX and was occupied by metal recycling operations from approximately the mid-1920s until the mid-1990s. One 1,000 gallon leaded gasoline UST was installed at this site as early as June 1962 and was abandoned in place in 1998. Previous site assessments revealed impacted soils and groundwater. However, subsequent testing did not indicate persistent groundwater contamination and, as a result, the FDEP is regulating this site as a contaminated soil site. The site has been redeveloped for light industrial use and a Remedial Action Plan (RAP) has been approved, indicating that contaminated soil will be placed under impervious surfaces and building foundations, and a vapor intrusion system will be implemented consisting of a 20-mil liner. Additionally, the property has a land use restriction for commercial and industrial uses only. The site is currently occupied by a premium automobile storage facility and no features of concern were observed during the site reconnaissance. The Northern portion (1111 N 35th St), located approximately 350 feet from the project corridor, was historically occupied with a bleach manufacturer, a grapefruit processor, as well as storage for the southern metal recycling business. Assessment activities identified soils impacted with PCBs that were subsequently removed from the site; any remaining soil contamination will be addressed through engineering controls and a land use restriction. Monitor wells installed to evaluate groundwater were abandoned in March and April 2023, and are currently waiting on approval from FDEP. Based on the reported distances from the subject property and current redevelopment plans, it is not anticipated that the soil contamination will substantially impact construction activities. As such, this site(s) is assigned a <b>Medium</b> risk.	<b>Medium</b>

Site No.	Site ID. per ERIS Radius Report	Facility Name	Location/ Address	County	Facility ID	Distance from ROW	Potential Concern(s)	Site History and Potential Contamination Parameters	Risk Evaluation Rating
062	127	RDK Truck Sales & SRVC/Engine Lab of Tampa Inc	3214 Adamo Dr, Tampa, FL 33605/1150 N 34th St, Tampa, FL 33605	Hillsborough	8625601 110002552853 110005620541 8625601LUAST FLD981868839 FLD984247346 8625601UST	200 feet North	Former Petroleum and Oil USTs and Soil Contamination	This facility, located approximately 200 feet north of the project ROW, reported a petroleum discharge in December 1988 that was associated with two (2) 4,000 gallon USTs, two (2) 2,000 gallon USTs, and two (2) 500 gallon USTs. These USTs were all removed from the site in 1989. The site was accepted into the Low Score Site Initiative (LSSI) plan and issued a cleanup priority score of 10; however, assessment activities remained idle for several decades awaiting State cleanup funding. Site assessment activities conducted in July 2018 identified soil contamination but did not identify any groundwater impacts. No further assessment documentation was available for review. According to available correspondence documents, FDEP has submitted several requests for site access which have not received a response. The facility is also designated as a RCRA SQG (EPA ID#: FLD981868839) and a RCRA SQG (EPA ID#: FLD984247346). Hazardous waste handled includes cadmium (D006), chromium (D007), benzene (D018), chlorobenzene (D021), 1,4-dichlorobenzene (D027), tetrachloroethylene (D039), and trichlorethylene (D040). According to the most recently available compliance inspection conducted on June 14, 2023, the facility was found to be in compliance. RDK Truck Sales was observed to be in operation during site reconnaissance. Based on the reported distances from the subject property and current redevelopment plans, it is not anticipated that the soil contamination will substantially impact construction activities. As such, this site is considered a <b>Medium</b> risk.	<b>Medium</b>
063	110, 111	North Bros Inc	602 N 34th St, Tampa, FL 33605	Hillsborough	110005639407 FLR000026591	201 feet South	RCRA Generator, Previous Soil and Groundwater Contamination	This facility is listed in the following databases: RCRA NON GEN, FINDS/FRS, WCRPS, DWM CONTAM, ERIC, and DEL CONTAM SITE. The facility is listed as a RCRA Non-Generator. Hazardous wastes associated with this facility includes corrosive waste (D002) and reactive waste (D003). A contamination investigation was conducted in November 1996 that identified petroleum impacted soil and vinyl chloride impacted groundwater. Source removal activities were conducted in January 1997. Groundwater sampling events conducted in September 2003, March 2004, and May 2005 indicated that vinyl chloride was no longer present above the GCTL. As such, a No Further Assessment status was issued by FDEP on January 29, 2013. No additional discharges or violations were identified since that time, and the facility now operates as Meter Technology Werks. No features of concern were observed during reconnaissance. As such, this facility is assigned a <b>Low</b> Risk.	<b>Low</b>
064	83	Unknown	4450 Adamo Drive, Tampa, FL	Hillsborough	Spills: 47884	180 ft north	Diesel spill	This listings indicates a spill of 45 gallons of diesel fuel from a fuel leak/overflow that occurred in October 2012. No documentation was readily available. Based on the amount of product reportedly spilled and duration of time since this event occurred, this listing represents a <b>Low</b> risk.	<b>Low</b>

This facility is registered as Used Oil Transporter, Hazardous Waste Transporter, and a Very Small Quantity Generator of Hazardous Waste. Numerous spills and emergency response incidents have been reported over the last several decades. During the most recent Hazardous Waste Inspection completed in March 2021, the facility ceased storage and transfer of hazardous waste in early 2020 and was found in compliance.  Two diesel ASTs (one 8,000-gallon and one 12-000 gallon) were registered to the CSX Clark Street facility in 1993. A LSSI report was completed for the Clark Street site in 2013, which revealed exceedances of SCTLs for TRPH, benzo(a)pyrene, and benzo(a)pyrene equivalents. No contaminants of concern were identified in groundwater. A letter from FDEP dated January 22, 2019 indicated that the facility was placed back into priority score funding order, that the petroleum contamination had not been generally characterized and the discharge did not meet the LSSI criteria due to further soil and groundwater assessment and requested that an updated LSSI application and proposal be submitted. A scope of work was submitted on September 16, 2020, which was accepted by the Petroleum Restoration Program Contracts Section on the same day; however, no additional assessment or remedial information was identified. The identified soil contamination is located greater than 150 feet south of the ROW. Based on the reported distances from the subject property and current redevelopment plans, it is not anticipated that the soil contamination will substantially impact construction activities. As such, this site is considered a <b>Medium</b> risk.	High
066	87 & 88	Bargain Computer Products of Ybor, LLC	4410 E Adamo Drive Suite 106, Tampa, FL	Hillsborough	FLR000200063	350 ft north	Universal waste generator	This facility was identified as a RCRA Non-Generator of Universal Waste with no reported violations over the past 12 quarters. An inspection in 2014 noted a violation for waste in a container that was not closed, but the facility promptly returned to compliance. The facility status was changed to closed on April 13, 2016. As such, this facility is assigned <b>No</b> risk.	No Risk
067	120	CSX Transportation-Tanker Spill	0.3 Mi W of 34th St & Adamo Dr, Tampa, FL 33605	Hillsborough	9806346 LUAST	Target Property	Contaminated Soil and Groundwater	In August 1996, approximately 100 gallons of diesel fuel was spilled in association with a train derailment. Source removal and confirmation groundwater sampling activities were conducted from August 13, 1996 to August 15, 1996. Hillsborough County EPC issued an approval letter, dated June 26, 1997, indicating that no further assessment was required. Based on the current regulatory status, this incident is assigned a <b>Low</b> risk.	Low

**TABLE 1 - POTENTIAL CONTAMINATION SITES SUMMARY**

Site No.	Site ID. per ERIS Radius Report	Facility Name	Location/ Address	County	Facility ID	Distance from ROW	Potential Concern(s)	Site History and Potential Contamination Parameters	Risk Evaluation Rating
068	N/A	N/A	Several areas along the project corridor	Hillsborough	N/A	Target Property	Railroad	This site is associated with a railroad that runs adjacent to and underneath the expressway. Historically, railroads would legally apply arsenic herbicides as a way to control weed growth on tracks, which have the potential to accumulate in the shallow soils and/or groundwater. Based on the potential for soil and/or groundwater contamination, and proximity to the ROW, the rail lines are assigned a <b>Medium</b> risk.	<b>Medium</b>
069	155	Bulkmatic Transportation Inc	1101 N 28th St, Tampa, FL 33605	Hillsborough	8625468	300 feet West	Diesel ASTs and Former Petroleum USTs	This facility historically contained four (4) 4,000 gallon USTs and two (2) 1,000 gallon USTs that were closed in place in 1988. Currently, this facility contains two (2) 10,000 gallon diesel ASTs that were installed in 2002. During a compliance inspection in May 2021, compliance violations for worn secondary containment, improperly installed valves, missing inspection records and missing financial documentation were identified. As of the date of this report, documentation was not available to indicate that the facility has returned to compliance. No discharges have been reported for this facility. During the site reconnaissance, two ASTs were observed to be in good condition and installed within secondary containment, with no evidence of a release observed. Based on the ongoing fueling operations, this facility is assigned a <b>Medium</b> risk.	<b>Medium</b>
070	129, 133	Dixie Plywood Co of Tampa Inc	3021 Adamo Dr, Tampa, FL 33605	Hillsborough	8625073	Target Property	Former Petroleum USTs	This facility historically contained an 8,000 gallon diesel UST and one 1,000 gallon unleaded gas UST that were removed in 1989/1990. The facility reported a petroleum discharge discovered during tank removal activities in January 1990. Approximately 50 cubic yards of petroleum impacted soil was removed and incinerated. Site assessment activities were completed over the next several years, and the facility received a NFA status from FDEP in October 1994. The site was observed to consist of a vacant lot during site reconnaissance. Based on the regulatory status of this facility, it is assigned a <b>Low</b> risk.	<b>Low</b>
071	125 & 128	Carroll Tire Co	3107 E Grace St, Tampa, FL	Hillsborough	96310	150 ft south	Inactive waste tire collector	This facility is listed as an inactive waste tire collector with no reported violations. As such, this facility is assigned <b>No</b> risk.	<b>No Risk</b>

**TABLE 1 - POTENTIAL CONTAMINATION SITES SUMMARY**

Site No.	Site ID. per ERIS Radius Report	Facility Name	Location/ Address	County	Facility ID	Distance from ROW	Potential Concern(s)	Site History and Potential Contamination Parameters	Risk Evaluation Rating
072	120, 121	Landfill #42 (McKay Nature Park)	McKay Nature Park, N 34th Street & E Adamo Drive	Hillsborough	ERIC_13867	South adjoining	Historic landfill/ Incinerator	Historically, this site was used as a city owned landfill, known as Landfill #42, that included an on-site ash producing incinerator. The landfill reportedly began operations in 1966 and accepted garbage and ash from the city incinerator. In 1997, the city conducted subsurface investigations that identified substantial quantities of buried construction debris and materials and a black, oily soil layer at >2 feet bls that contained concentrations of metals, PAHs, and pesticides above regulatory cleanup levels. The extent of this oily layer was not determined. No contaminants of concern were identified in groundwater above regulatory cleanup target levels. For several years, the City and FDEP negotiated the appropriate assessment strategy, culminating in 2008 with a workplan to conduct supplemental groundwater sampling. No additional records were readily available, and it is unknown if any additional assessment was conducted. During the site reconnaissance, buried debris including rusted metal, cement, and asphalt was observed. This site is currently operated as the McKay Bay Nature Park. Based on historic landfill/incineration activities, documented contamination, and construction debris observed on the surface of the property during site reconnaissance, this site is assigned a <b>High</b> risk.	High
073	185	Port Consolidated Inc/ Former Spartan Oil Co/ FDOT Property Crosstown Connector #8/ Current THEA Stormwater Pond	2815 Long St, Tampa, FL 33605	Hillsborough	8509056AST 9808457AST 8509056UST	26 feet West	Former Petroleum and Oil USTs, Former Petroleum USTs, Petroleum Groundwater Plume	This facility historically operated as a petroleum and petroleum products merchant wholesaler that contained two (2) 70,000 gallon ASTs, one 12,000 gallon AST, three (3) 10,000 gallon ASTs, seven (7) 2,000 gallon ASTs, and two (2) 1,000 gallon ASTs that were removed from the site from 2007 to 2008. The facility also contained one 25,000 gallon UST, one 20,000 gallon UST, and four (4) 10,000 gallon USTs that were removed from the site in 2008. The facility reported two petroleum discharges in October 1992 and November 2007. The October 1992 discharge is currently being assessed under the FDEP LSSI program and the November 2007 discharge received NFA closure in April 2011. According to a LSSI Site Status Letter issued by FDEP on December 8, 2021, the petroleum contamination has not been fully characterized; however, further assessment and remediation activities are on hold until additional funding becomes available. This site was observed to consist of a stormwater retention pond during site reconnaissance. Based on the reported groundwater contamination and the close proximity to the ROW, this facility is assigned a <b>High</b> risk.	High
074	162	Affiliated of Florida Inc	1102 N 28th Street, Tampa, FL	Hillsborough	8840679, FLD982077984	110 feet north	Historic ASTs	This facility historically operated two (2) 10,000-gallon vehicular diesel ASTs that were reportedly installed in June 1988 and closed in place in December 1994. No reported discharges or violations were identified in association with the ASTs. The current facility operating at this location is J&J Snack Foods. This site is assigned a <b>Low</b> Risk.	Low

**TABLE 1 - POTENTIAL CONTAMINATION SITES SUMMARY**

Site No.	Site ID. per ERIS Radius Report	Facility Name	Location/ Address	County	Facility ID	Distance from ROW	Potential Concern(s)	Site History and Potential Contamination Parameters	Risk Evaluation Rating
075	177, 180	Swift Adhesives & Coatings/Amcraft Fixtures/Ikea Tampa Overflow Parking Lot/Southeastern Bolt & Screw	605 N 26th St, Tampa, FL 33605/815 N 26th St, Tampa, FL 33605	Hillsborough	110002534543 110005659901 110038371115 FLR10IE26INPDES FLR10IE26 FLT990064297 FLD064687577 FLR000061911 8625702UST 8944024UST ERIC 13745	385 feet North	Former Petroleum USTs, RCRA Generators and Non-NPL Superfund Site	Historically, this facility was occupied by a wood fixture manufacturer business that contained one 1,500 gallon UST that was removed in 1985 and one 1,000 gallon UST that was reportedly removed. The facility is listed in the Superfund enterprise management system (EPA ID: FLD064687577) as a non-NPL facility. During due diligence activities conducted in 1989, chlorinated solvents were identified in a well that was identified during a site reconnaissance. Additional assessment and remedial activities were conducted over the next several years, including the removal of approximately 180 tons of soil from the former UST area. In December 1998, the facility was issued a SRCO. The site has since been redeveloped as the Blue Sky Self Storage facility that is designated as a RCRA VSG (EPA ID#: FLT990064297), a RCRA Non-Generator (EPA ID#:FLD064687577), and a RCRA Non-Generator (EPA ID#: FLR000061911) with no reported violations over the last 3 years. No environmental concerns were observed during reconnaissance. Based on the current regulatory status, this facility is assigned a <b>Low</b> risk.	<b>Low</b>
076	178, 183, 197	Verizon Global Networks/Panattoni/Ikea Tampa/Tampa International Center Brownfield Area/Tampa International Center Brownfield Site/The Tampa Tribune	1103 N 22nd St, Tampa, FL 33605/1103 N 22nd St A, FL 33605/1103 N 22nd St Ste B, Tampa, FL 33605/1103 N 22nd St Ste E, Tampa, FL 33605/1103-G North 22nd St, Tampa, FL 33605	Hillsborough	8627972AST 9045667AST BF290703000 BF290703001BSRA BF290703001 110033630710 110035711708 1025476 110035816579 FLR10HG71INPDES 612 FLRNEE254INPDES 9045667LUAST FLR10HG71 FLR10GL15 FLRNEE254 8627972UST 9045667UST	Target Property	Historic Printing Press, Soil Contamination, Restrictive Covenant, Engineering Controls	This facility (Facility ID: ERIC_6574) was historically occupied by a cannery from 1936 until 1981 when it was occupied by a printing press that operated until 2000. The facility historically contained two (2) 2,000 gallon USTs, three (3) 1,000 gallon USTs, and two (2) 888 gallon USTs. All USTs were removed from the site between 1989 to 2008. During due diligence activities conducted in June/July 2005, groundwater contamination was identified. Groundwater monitoring conducted over the next two years indicated contamination had decreased to below regulatory cleanup target levels and the site was issued a NFA SRCO was issued for the Tampa International Center / Tampa Tribune Lift Station facility in 2007. The site is currently occupied by Ikea and was designated a Brownfield site (Site ID: 290703001) in 2008. In 2008, an application for voluntary cleanup tax credit program was submitted and the property became a designated brownfield site. However, in July 2008, an Engineering Controls Certification letter identified past soil contamination and remediation activities; a two-foot thick clean fill cap was placed above the entire property area. On June 5, 2009, a declaration of restrictive covenant (DRC) was established that limited the use of the property to commercial or industrial. The Ikea currently contains one 1,800 gallon diesel AST and one 800 gallon diesel AST. No features of concern were observed during the site reconnaissance. The identified soil contamination is located greater than 150 feet south of the ROW. Based on the reported distances from the subject property and current redevelopment plans, it is not anticipated that the soil contamination will substantially impact construction activities. As such, this site is considered a <b>Medium</b> risk.	<b>Medium</b>

**TABLE 1 - POTENTIAL CONTAMINATION SITES SUMMARY**

Site No.	Site ID. <small>per ERIS Radius Report</small>	Facility Name	Location/ Address	County	Facility ID	Distance from ROW	Potential Concern(s)	Site History and Potential Contamination Parameters	Risk Evaluation Rating
077	54	H & E Equipment Services Inc. #4020	6227 E Adamo Drive, Tampa, FL	Hillsborough	6073754	260 ft north	Chemical handling	This facility operates as a heavy machinery equipment rental agency and is identified in the TIER 2 database as a handler of chemicals such as lead, petroleum distillates, diesel fuel, sulfuric acid, petroleum based oil, hydraulic fluid, and waste oil. There have been no reported discharges, and no records were readily available for review. Based on the reported storage and handling of hazardous materials and petroleum products, this site represents <b>Low</b> risk.	<b>Low</b>

NPDES permit facilities were not included in this table. The remaining facilities listed in the ERIS Database Report are over 500-feet away from the project corridor and were not included in this table.

## 6.2 MEDIUM/HIGH RISK POTENTIAL SITES

The risk assessment was conducted using FDOT PD&E Manual Volume 2, Chapter 20 as a reference. Sixteen medium risk and eight high risk sites were identified.

## 7.0 CONCLUSIONS AND RECOMMENDATIONS

A total of seventy-nine (79) potentially contaminated and/or known to be contaminated sites were identified within the search buffer radii of the project study area. The ERIS Database Report is included in **Appendix A**. Online database review records are included in **Appendix B**. Forty-nine (49) facilities were identified adjacent to the project study area as a Low Risk. Sixteen (16) facilities located within the project study area were identified as a Medium Risk, and eight (8) facilities located within the project study area were identified as a High Risk. A summary of the risk assessments for the proposed project is presented in **Table 2** below.

<b>TABLE 2: SUMMARY OF POTENTIAL CONTAMINATION SITES RISK ASSESSMENTS</b>	
<b>Risk Assessment Category</b>	<b>Number of Sites</b>
No	6
Low	49
Medium	16
High	8

Level II Contamination Assessment investigations are recommended for any areas that have proposed dewatering or subsurface work activities (e.g., pole foundations, drainage features) occurring adjacent to or at the Medium and High risk sites listed above. If dewatering will be necessary during construction, a SWFWMD Water Use Permit will be required. The contractor will be held responsible for ensuring compliance with any necessary dewatering permit(s). All permits will be obtained in accordance with Federal, State, and local laws and regulations.

## **Notice: IMPORTANT LIMITATIONS and YOUR LIABILITY**

**Reliance on information in Report:** This report DOES NOT replace a full Phase I Environmental Site Assessment but is solely intended to be used as database review of environmental records.

**License for use of information in Report:** No page of this report can be used without this cover page, this notice and the project property identifier. The information in Report(s) may not be modified or re-sold.

**Your Liability for misuse:** Using this Service and/or its reports in a manner contrary to this Notice or your agreement will be in breach of copyright and contract and ERIS may obtain damages for such mis-use, including damages caused to third parties, and gives ERIS the right to terminate your account, rescind your license to any previous reports and to bar you from future use of the Service.

**No warranty of Accuracy or Liability for ERIS:** The information contained in this report has been produced by ERIS Information Inc. ("ERIS") using various sources of information, including information provided by Federal and State government departments. The report applies only to the address and up to the date specified on the cover of this report, and any alterations or deviation from this description will require a new report. This report and the data contained herein does not purport to be and does not constitute a guarantee of the accuracy of the information contained herein and does not constitute a legal opinion nor medical advice. Although ERIS has endeavored to present you with information that is accurate, ERIS disclaims, any and all liability for any errors, omissions, or inaccuracies in such information and data, whether attributable to inadvertence, negligence or otherwise, and for any consequences arising therefrom. Liability on the part of ERIS is limited to the monetary value paid for this report.

**Trademark and Copyright:** You may not use the ERIS trademarks or attribute any work to ERIS other than as outlined above. This Service and Report (s) are protected by copyright owned by ERIS Information Inc. Copyright in data used in the Service or Report(s) (the "Data") is owned by ERIS or its licensors. The Service, Report(s) and Data may not be copied or reproduced in whole or in any substantial part without prior written consent of ERIS.

# Executive Summary

## Property Information:

**Project Property:** *THEA*  
*n/a Tampa FL*

**Project No:** *049531000*

### **Coordinates:**

**Latitude:** *27.94363685*  
**Longitude:** *-82.38511447*  
**UTM Northing:** *3,091,730.70*  
**UTM Easting:** *363,733.76*  
**UTM Zone:** *17R*

**Elevation:** *11 FT*

## Order Information:

**Order No:** *22121500236*  
**Date Requested:** *December 15, 2022*  
**Requested by:** *Kimley-Horn & Associates, Inc*  
**Report Type:** *Quote - Custom Radius - Linear Reports*

## Historicals/Products:

#### FDEP - Storage Tank Contamination Monitoring (STCM) Details

**Name:** Marathon-Selmon #739  
410 S 50th St  
Tampa, FL 33619- 3650

**LL Method:** DPHO - Autonomous GPS

**Account Owner:** Automated Petroleum & Energy Co Inc (Apec)

**Contact:** Rick Herweh

**Phone:** 813-681-4279

**District:** SWD

**County 1:** 29 - Hillsborough

**Latitude:** 27:56:52.1398

**Longitude:** 82:24:04.6788

#### FDEP - Registered Tanks from Storage Tank Contamination Monitoring (STCM) Details

**Tank No:** 3

**Size:** 12000

**Content:** Vehicular Diesel

**Installed:** 06/01/2000

**Placement:** UNDER

**Status:** In Service

**Construction:** C - Steel  
M - Spill Containment Bucket  
N - Flow Shut-Off  
O - Tight Fill  
P - Level Gauges/Alarms

**Piping:** R - Double Wall - Tank Jacket  
C - Fiberglass  
F - Double Wall  
J - Pressurized Piping System

**Monitoring:** K - Dispenser Liners  
1 - Continuous Electronic Sensing  
2 - Visual Inspect Pipe Sumps  
4 - Visual Inspect Dispenser Liners  
F - Monitor Dbl Wall Tank Space  
G - Electronic Line Leak Detector  
K - Monitor Dbl Wall Pipe Space

#### **FDEP - Storage Tank Contamination Monitoring (STCM) Details**

**Name:** Manheim Tampa  
401 S 50th St  
Tampa, FL 33619- 3651

**LL Method:** DPHO - Autonomous GPS

**Account Owner:** Manheim Tampa Total Resource Auction

**Contact:** John Farley Sr

**Phone:** 813-247-1666

**District:** SWD

**County 1:** 29 - Hillsborough

**Latitude:** 27:56:46.3938

**Longitude:** 82:24:22.3952

#### **FDEP - Registered Tanks from Storage Tank Contamination Monitoring (STCM) Details**

**Tank No:** 1

**Size:** 1000

**Content:** Unleaded Gas

**Installed:** 01/01/1990

**Placement:** ABOVE

**Status:** In Service

**Construction:** C - Steel  
K - Ast Containment  
P - Level Gauges/Alarms

**Piping:** A - Abv, No Soil Contact  
B - Steel/Galvanized Metal  
I - Suction Piping System

**Monitoring:** Q - Visual Inspection Of Asts

**FDEP - Storage Tank Contamination Monitoring (STCM) Details**

**Name:** Tampa City-East Tampa Sewage Pump  
1201 N 39th St  
Tampa, FL 33605

**LL Method:** DPHO - Autonomous GPS

**Account Owner:** Tampa City Dept Sanitary Sewers

**Contact:** Chris Simko

**Phone:** 813-247-3451

**District:** SWD

**County 1:** 29 - Hillsborough

**Latitude:** 27:57:23.4964

**Longitude:** 82:24:47.6995

**FDEP - Registered Tanks from Storage Tank Contamination Monitoring (STCM) Details**

**Tank No:** 1

**Size:** 2000

**Content:** Emerg Generator Diesel

**Installed:** 06/01/1996

**Placement:** ABOVE

**Status:** In Service

**Construction:** C - Steel  
K - Ast Containment  
M - Spill Containment Bucket  
P - Level Gauges/Alarms  
R - Double Wall - Tank Jacket

**Piping:** A - Abv, No Soil Contact  
B - Steel/Galvanized Metal

**Monitoring:** I - Suction Piping System  
F - Monitor Dbl Wall Tank Space  
Q - Visual Inspection Of Asts

<b>Description of Events:</b>	DRIVER BACKED UNIT INTO CONSIGNEE'S LOCATION OF BUSINESS AND STOOD BY WHILE CONSIGNEE'S EMPLOYEES HOOKED UP AND UNLOADED TRAILER. WHILE WAITING DRIVER NOTICED VAPOR CLOUD EMITTING FROM AREA OF TANK AND NOTIFIED PLANT EMPLOYEE AND ALSO SHUT PRODUCT VALVE OFF AT TRAILER. PRODUCT OVERFLOWED INTO A CONTAINED AREA WHERE IT WAS RETRIEVED BY OPERATORS OF PLANT. CONSIGNEE OPERATIONS HANDLED ALL CLEANING OF PRODUCT AND AREA.

Description of Events:					IBC WAS LOADED ON THE TRAILER FOR FOR TRANSPORT. INVESTIGATION CONCLUDES THAT THE VEHICLE VIBRATION CAUSED THE DISCHARGE VALVE ASSEMBLY WHICH APPEARS TO HAVE BEEN LOOSE TO LOOSEN EVEN MORE. AS THE ASSEMBLY LOOSENED AND TWISTED THE BALL VALVE HANDLE WAS FORCED AGAINST THE FRAME CAUSING IT TO OPEN SLIGHTY PRODUCING THE SPILLAGE. THE DRIVER WAS IN ROUTE WHEN HE NOTICED THE FUMES COMING FROM THE TRAILER. AFTER INSPECTION HE NOTIFIED HIS SUPERVISOR. HE RETURNED TO THE ORIGIN. WE FOUND THAT THE MAJORITY OF PRODUCT WAS CONTAINED INSIDE THE TRAILER. THE IBC WAS REMOVED FROM THE TRAILER AND THE MATERIAL WAS TRANSFER TO ANOTHER IBC AND MEASURED TO DETERMINE THE 25-GALLON RELEASE. THE MATERIAL WAS ABSORBED WITH A NEUTRALIZING ABSORBENT THE	

Map Key	Number of Records	Direction	Distance (mi/ft)	Elev/Diff (ft)	Site	DB
---------	-------------------	-----------	------------------	----------------	------	----

TRAILER WAS WASHED IN CONTAINMENT AND THE WATER WAS NEUTRALIZED ACCORDING TO PERMIT. POST ACCIDENT TEST FOUND THE VALVE DID NOT MALFUNCTION NOR DAMAGED BUT THE WHOLE ASSEMBLY WAS LOOSE REPAIRED AND TESTED WITH WATER.

<b>Description of Events:</b>	DRIVER BACKED UNIT INTO CONSIGNEE'S LOCATION OF BUSINESS AND STOOD BY WHILE CONSIGNEE'S EMPLOYEES HOOKED UP AND UNLOADED TRAILER. WHILE WAITING, DRIVER NOTICED VAPOR CLOUD EMITTING FROM AREA OF TANK AND NOTIFIED PLANT EMPLOYEE AND ALSO SHUT PRODUCT VALVE OFF AT TRAILER. PRODUCT OVERFLOWED INTO A CONTAINED AREA WHERE IT WAS RETRIEVED BY OPERATORS OF PLANT. CONSIGNEE OPERATIONS HANDLED ALL CLEANING OF PRODUCT AND AREA.

<b>Haz Non Hosp Resp:</b>	0				<b>Undeclared Shipment:</b>	No
<b>Description of Events:</b>	<p>IBC WAS LOADED ON THE TRAILER FOR FOR TRANSPORT. INVESTIGATION CONCLUDES THAT THE VEHICLE VIBRATION CAUSED THE DISCHARGE VALVE ASSEMBLY, WHICH APPEARS TO HAVE BEEN LOOSE, TO LOOSEN EVEN MORE. AS THE ASSEMBLY LOOSENED AND TWISTED, THE BALL VALVE HANDLE WAS FORCED AGAINST THE FRAME CAUSING IT TO OPEN SLIGHTY PRODUCING THE SPILLAGE. THE DRIVER WAS IN ROUTE WHEN HE NOTICED THE FUMES COMING FROM THE TRAILER. AFTER INSPECTION HE NOTIFIED HIS SUPERVISOR. HE RETURNED TO THE ORIGIN. WE FOUND THAT THE MAJORITY OF PRODUCT WAS CONTAINED INSIDE THE TRAILER. THE IBC WAS REMOVED FROM THE TRAILER AND THE MATERIAL WAS TRANSFER TO ANOTHER IBC AND MEASURED TO DETERMINE THE 25-GALLON RELEASE. THE MATERIAL WAS ABSORBED WITH A NEUTRALIZING ABSORBENT, THE TRAILER WAS WASHED IN CONTAINMENT AND THE WATER WAS NEUTRALIZED ACCORDING TO PERMIT. POST ACCIDENT TEST FOUND THE VALVE DID NOT MALFUNCTION NOR DAMAGED, BUT THE WHOLE ASSEMBLY WAS LOOSE, REPAIRED AND TESTED WITH WATER.</p>

**Description of Events:** THE EMPLOYEE WAS IN THE ACT OF TRANSFERRING H2O2 FROM TANK CAR TO TRAILER WHEN HE NOTICED A SMALL AMOUNT OF PRODUCT LEAKING FROM TOP OF TRAILER AND HE IMMEDIATELY SHUTOFF THE PUMP. THE METHOD OF TRANSFER WAS BY A METERED PUMP. THE EMPLOYEE WAS STANDING NEXT TO THE PUMP BUT WAS NOT MONITORING TRANSFER AND OVERFILLED THE TRAILER.

Description of Events:	<p>A release occurred on 7/15/2010 at 10:45 am while in the process of setting up a Basic Chemical Sulfuric Acid transfer to be loaded on trailer CTL 252. The loader set up the unloading tee on top of the railcar then failed to close the valves on the product tee before pressurizing the vessel. This resulted in a product release of estimated 50 gallons: 15 gallons on the asphalt and approximately 35 gallons in the storm drain containment. Once the spill was identified the Loader immediately closed the product valve on top of the railcar and radioed a code yellow. The Tampa team immediately began to dam and dike the area with soda ash. After the spill was contained the Manager notified the appropriate contacts.</p>					
Recommend Actions Taken:	<p>Retrain all employees on transferring corrosive product utilizing blower pac/air compressor work instruction SSP 3025-002-KMMS-ALL and document training on form S1686. Loader is to ensure that all valves on tee fittings are in the closed position after connecting to the railcar. Loaders retrained on never pressurizing a railcar prior to</p>					

verification that all hoses and fittings are connected.

**Description of Events:** A Transfer was being conducted between railcar (UTLX 13923) and a single compartment trailer (23088) with a single dome. The loader climbed to the top of the railcar to prepare for the transfer shut down. He noticed product spraying from the jumper hose between the Air tee valve and the Product tee valve. The loader closed the product valve. The product was contained inside the track pans no product contacted the ground. Team members responded immediately and applied soda ash to the spilled product. Clean up material was placed in designated drum and properly marked.

**Recommend Actions Taken:** Continue to diligently perform arrival inspections and closely monitor loads in progress. Have placed in practice a policy of using most experienced loaders for sulfuric acid loads.

<b>Description of Events:</b>	NARRATIVE: On 9/30 at 9:05am the Crew Leader noticed Sulfuric Acid on the side of railcar GATX 5855. Code yellow was announced and several team members responded. A Loader in all the required PPE climbed to the top of the railcar and identified liquid seeping from the product hose. He re-positioned the product and the leak stopped. AWARENESS ITEM: 1. All product hose gaskets have recently been changed. 2. All sulfuric acid and caustic valves are inspected prior to being put into service. 3. Leak started 15 minutes after the transfer was completed.					
<b>Recommend Actions Taken:</b>	ROOT CAUSES: 1. Equipment failure: Product hose gasket leaked between product hose and product valve connection due to the alignment of the hose to the product valve. CORRECTIVE ACTION: 1. Recommended to TRANSFLO that a 45 degree fitting be installed between the product hose and valve to allow for direct alignment and reduce the weight on the connection.

**Description of Events:** NARRATIVE: On October 13th at 11:45am a rail to truck ethanol transfer was being conducted. This was a four compartment trailer and the first compartment had been completed. The second compartment was to receive 2000 gallons. Loader made all necessary connections and then set the pump pre-set meter for 2000 gallons. He started the transfer and periodically observed the meter for gallons pumped. He first observed 1000 gallons had been transferred then looked back and noticed the meter was stuck on 1600 gallons. As he reached to shut down the transfer he noticed compartment # 2 had overfilled. Approximately 5 gallons of ethanol was retained in the drip pan and an additional 5 gallons overflowed the drip pan and contacted the ground. No drains or water was affected. AWARENESS ITEMS: 1. The scully switch cover was closed and locked and keys were controlled by management. Always ensure the pump is not in bypass mode prior to locking the cover. 2. Pump had a history of mechanical failure with its last repair being to the volume meter on 9/20/11. This was the second transfer after the repair. 3. The scully is a protective system put in place to ensure trailers are not overloaded. When operated in bypass mode we work without any backup protective system. 4. Scully lights were tested and were proper working order: green-good ground; red- no ground; no lights if in bypass. 5. Floater employee was familiar with ethanol operation.

**Recommend Actions Taken:** ROOT CAUSES: 1. Equipment failure. It was determined by an outside mechanic that the meter box was not functioning properly. RBT made the recommendation to have the preset meter temperature compensator and volume meter replaced. 2. The pump was being operated while in bypass mode. CORRECTIVE ACTIONS: 1. Pump was immediately locked out and taken out of service. 2. The inspection of all scully switches will be made part of the monthly inspection to ensure they are not in bypass mode. This is to be documented on the inspection sheet.

**Description of Events:** After a transfer of sulfuric acid between railcar TILX 100524 and CTL Trailer# 23088 took place product was observed leaking running down the side of the railcar. The railcar remained set up after first transfer. A Loader with the required PPE climbed to the top up the railcar and identified the product tee fitting as being loose. Pressure inside the railcar forced liquid out from around the loose fitting. Several pictures were taken of the spill and the leaking tee fitting. Approximately 2 gallons of product leaked from the railcar to the 1'x 1 square gravel area beside the track. No product entered the storm drain. Lime was used to neutralize the acid. All clean up material was put into containers and labeled.

**Recommend Actions Taken:** ROOT CAUSE: 1. The railcar was not depressurized prior to the Loader leaving the transfer area unattended because it was not specifically stated in the Site-Specific Procedure (SSP). 2. The pipe connection was not properly tool tight when the transfer was originally set-up due to wear and tear of the fitting. 3. The stainless steel pipe tee was not properly inspected to identify excessive wear before being utilized for the transfer. CORRECTIVE ACTIONS: 1. Add warning to SSP 3025-002 to reflect that railcars should be depressurized if there isn't another trailer readily available to load. 2. Terminal will inspect and remove from service all fittings and connections that may be damaged or have excessive wear and tear from use.

**Description of Events:**

On October 8 2010 five to seven gallons of Hydrogen Peroxide impacted the asphalt during a transfer. After the transfer was verified the bleeder valve was opened in order to prime the equipment. Once the equipment was primed and the transfer up and running the loader did not close the valve. Residual product released into the reservoir tank resulting in a five to seven gallon release of product impacting the asphalt. Water was applied to the affected area as per the MSDS. After speaking with the loader who did the previous transfer on October 7 2010 he informed the Terminal Manager that the reservoir had been filled with water during his transfer; therefore the amount of actual Hydrogen Peroxide impacting the asphalt may be less than the estimated five to seven gallons.

There were no injuries and no drains were impacted.

**Recommend Actions Taken:**

ROOT CAUSE: The Loader failed to close the bleeder valve after priming the pump. In a post incident interview the Loader stated that he was having personal issues after a recent car accident. He was stressed over the property damage which made him lose his focus; he did not communicate this to his Supervisor at the beginning of the shift. CORRECTIVE ACTIONS: 1. SSP 3025-006 was updated to include process of closing the valve after the pump is primed. All employees were re-trained on updated procedure. 2. High density five gallon bucket is now being utilized under the bleeder valve on every transfer. 3. The Verifier will remind the Loader to close the bleeder valve once equipment is primed during verification. 4. Contact Shipper and TRANSFLO to discuss the possibility of obtaining a pump with a spring loaded valve which would automatically close once the valve is released after the pump is primed. 5. All employees were asked to speak up during morning safety meetings if they had any issues that would hinder their performance

<b>Description of Events:</b>	On 9/23/08 at 7:15 pm railcar TILX 199806 imploded due to an operational error. Approximately 50 gallons of ethanol was released onto the asphalt surface. The product was contained cleaned and placed in 50 gallon drums labeled as hazardous waste.					
<b>Recommend Actions Taken:</b>	Retrain all loaders on the proper way to set-up and perform all pump transfers that utilize venting or vapor recovery. Retrain all certified verifiers on the verification policies & procedures and stress the importance of a complete & thorough verification on each transfer. Retrain all certified verifiers on the importance of focusing on the					

Map Key	Number of Records	Direction	Distance (mi/ft)	Elev/Diff (ft)	Site	DB
---------	-------------------	-----------	------------------	----------------	------	----

task at hand. Ensure that a pre-load checklist is available for each transfer. Have every terminal purchase a 1 inch diameter 12 to 14 inch long piece of PVC pipe to place on the air valve handle for each pump transfer that requires venting or vapor recovery. This piece of pipe needs to be painted a high visibility color.

<b>Description of Events:</b>	On 8/17 at approx 5:45 am while making his rounds the Crew Leader noticed a shiny substance in the track pan and ballast on Track 5. When he approached the loader to question the loader stated that sulfuric acid had spilled from the product cap. 1. The TM re-reviewed the SSP for transferring sulfuric acid two weeks prior to the incident occurring. 2. The importance of immediately reporting incidents was recently discussed with all terminal personnel on the heels of a previous release.					
<b>Recommend Actions Taken:</b>	<p>ROOT CAUSES: 1. Employee did not ensure that the railcar was depressurized per the SSP 3025-002 prior to opening the product cap. Employee was in the habit of opening the product valve without relieving pressure from cars with a safety valve on the product line. 2. Employee was identified as learning better through repetition rather than by the SSP and was not properly monitored to ensure all necessary steps were followed to prevent incident.</p> <p>CORRECTIVE ACTIONS: 1. TM realigned loaders to ensure that a senior loader conducts acid transfers. A secondary loader will be assigned to ensure continuity and coverage. 2. Ensure employees are monitored and demonstrate proficiency in the task at hand prior to completing an Employee Demonstration Checklist and working unattended. 3. Certify a Spanish speaking trainer to ensure all components of the SSP are properly communicated and adhered to.</p>

**Description of Events:** On 11/11/15 Terminal Mgr Kevin Roberts was contacted by the CSX Switch Crew stating that CBTX 780830 (located on track 6) had some freezing on dome lid along with a gas odor . The TM arrived at the terminal by 23:45 and immediately consulted with the Hillsborough Fire Department (on site). The TM along with fire rescue used the LPG rack on Track 6 to ascend the car. He opened the dome lid and discovered that the plugs on the liquid and vapor lines were not too tight. One of the liquid lines was slightly ajar due to a small amount of trash/debris in the valve not allowing it to seat properly. The TM tightened the valve and plugs. The hazmat responders tested the valves with a leak detector and determined that everything was secure with no LPG present.

**Recommend Actions Taken:** To prevent future actions: Entire terminal held a stand down to discuss the importance and methods for securing RCs. The terminal added a step in the process requiring a supervisor to secure all cars before departing every night.

Description of Events:	THE EMPLOYEE WAS IN THE ACT OF TRANSFERRING THE HYSOL 10 PRODUCT FROM A TANKCAR TO A TRAILER WHEN HE NOTICED THAT A SMALL AMOUNT WAS LEAKING FROM THE DOME LID AND HE IMMEDIATELY SHUT THE PUMP OFF. THE LABORER INADVERTENTLY HOOKED THE PRODUCT HOSE TO THE WRONG COMPARTMENT ON THE TRAILER WHICH DID NOT HAVE ADEQUATE CAPACITY FOR THE AMOUNT THAT WAS CALLED FOR ON THE WORK ORDER.

<b>Description of Events:</b>	<p>NARRATIVE: On 9/26/11 at approximately 11:55 hrs an estimated 1 quart of Caustic Soda was released. A Transfer was being conducted between railcar (GATX 49425) and a single compartment trailer (22059) with a single dome. The loader noticed product leaking down the side of the railcar. The loader climbed to the top of the railcar and noticed product leaking from the jumper hose between the Air tee valve and the Product tee valve. The loader closed the product valve and then called code yellow. The product was contained inside the track pans; no product contacted the ground water or drains. Team members responded to the code yellow and immediately brimmed and dike inside the track pan. Vinegar used to neutralize and sand was used absorb the Caustic.</p> <p>AWARENESS ITEMS: 1. The Terminal Manager re-reviewed the SSP for transferring corrosive product via blower pac/air compressor on 8-9-2011 2. Ensure all valves fittings hoses and tools required to perform the assigned task are inspected as part of the daily inspection. 3. The ruptured airline was replaced 2 weeks ago. 4. The Loader was fully trained on this transfer and demonstrated proficiency.</p>					
<b>Recommend Actions Taken:</b>	<p>ROOT CAUSES: 1. Loader inadvertently opened the product valve and introduced product to the air line. 2. The jumper hose between air valve assembly and the product valve assembly ruptured when product was introduced.</p> <p>CORRECTIVE ACTIONS: 1. Retrain all employees to ensure valves are operated in accordance to the SSP. Re-training will be documented on Form 1686. 2. The air line was taken out of service and was replaced after the rupture.</p>

<b>Description of Events:</b>	<p>Railcar GATX #95781 arrived at Tampa TRANSFLO terminal on 9/19/2012. Arrival Inspection was conducted on 9/19/2012 by Terminal Manager. Only documented defect was a missing chain on the sample tube cap. No indications of any defects or releases. Two full truck loads and one partial were taken off railcar GATX 95781 on 9/19/2012; the day before the release. No issues observed during this transfer. There was no release of gas when the gate valve was opened. The railcar was not being offloaded when the release was discovered on 9/20/2012. The loader was going to connect a vapor recover hose from an empty railcar into GATX 95781. He connected to the empty railcar and as he was going to connect the vapor recovery hose to GATX 95781 he discovered the leak. No issues noted until valve was opened. The terminal and CSX/TRANSFLO notified the local Fire Department and Hillsborough County EMA. Emergency response contractor was also deployed onsite to evaluate situation and car was then off-loaded without incident at 13:15. Temperature was approximately 77 °F at time of release on 9/20/2012. Average temperature on 9/19/2012 was 82 °F. RESCAR suspects temperature change may have been a factor but unsure what caused seal to not set properly. Seal on gate valve of the liquid side not seated properly. RESCAR was not able to repair the valve on-site. Further information on cause may be available when repairs can be made off-site at the railcar repair shop. NGL secured a One-Time Movement Approval (OTMA) from the DOT before releasing railcar to a repair shop.</p>					
<b>Recommend Actions Taken:</b>	Awaiting results from repair facility.

Description of Events:	THE EMPLOYEE WAS IN THE ACT OF TRANSFERRING THE QUICK DRY PRODUCT FROM A TANKCAR TO A TRAILER WHEN HE NOTICED THAT A SMALL AMOUNT WAS LEAKING FROM THE DOME LID AND HE IMMEDIATELY SHUT THE PUMP OFF. THE METHOD OF TRANSFER WAS BY METERED PUMP AND THE EMPLOYEE WAS STANDING NEXT TO THE PUMP BUT LOST HIS FOCUS AND OVERFILLED THE TRAILER. MOST OF THE SPILLAGE WAS CAUGHT BY A DRIP BUCKET.

<b>Waste Code Description:</b>			THE FOLLOWING SPENT NONHALOGENATED SOLVENTS: XYLENE, ACETONE, ETHYL ACETATE, ETHYL BENZENE, ETHYL ETHER, METHYL ISOBUTYL KETONE, N-BUTYL ALCOHOL, CYCLOHEXANONE, AND METHANOL; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONLY THE ABOVE SPENT NONHALOGENATED SOLVENTS; AND ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONE OR MORE OF THE ABOVE NONHALOGENATED SOLVENTS, AND A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THOSE SOLVENTS LISTED IN F001, F002, F004, AND F005; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.			
<b>Hazardous Waste Code:</b>			F005			
<b>Waste Code Description:</b>			THE FOLLOWING SPENT NONHALOGENATED SOLVENTS: TOLUENE, METHYL ETHYL KETONE, CARBON DISULFIDE, ISOBUTANOL, PYRIDINE, BENZENE, 2-ETHOXYETHANOL, AND 2-NITROPROPANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE NONHALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F001, F002, OR F004; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.			
<b>Hazardous Waste Code:</b>			D001			
<b>Waste Code Description:</b>			IGNITABLE WASTE			

<b>Map Key</b>	<b>Number of Records</b>	<b>Direction</b>	<b>Distance (mi/ft)</b>	<b>Elev/Diff (ft)</b>	<b>Site</b>	<b>DB</b>
<b>Hazardous Waste Code:</b>		D005				
<b>Waste Code Description:</b>		BARIUM				
<b>Hazardous Waste Code:</b>		D007				
<b>Waste Code Description:</b>		CHROMIUM				
<b>Hazardous Waste Code:</b>		D009				
<b>Waste Code Description:</b>		MERCURY				
<b>Hazardous Waste Code:</b>		D011				
<b>Waste Code Description:</b>		SILVER				
<b>Hazardous Waste Code:</b>		D035				
<b>Waste Code Description:</b>		METHYL ETHYL KETONE				
<b>Hazardous Waste Code:</b>		F001				
<b>Waste Code Description:</b>		THE FOLLOWING SPENT HALOGENATED SOLVENTS USED IN DEGREASING: TETRACHLOROETHYLENE, TRICHLOROETHYLENE, METHYLENE CHLORIDE, 1,1,1-TRICHLOROETHANE, CARBON TETRACHLORIDE AND CHLORINATED FLUOROCARBONS; ALL SPENT SOLVENT MIXTURES/BLENDS USED IN DEGREASING CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE HALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F002, F004, AND F005; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.				
<b>Hazardous Waste Code:</b>		F004				
<b>Waste Code Description:</b>		THE FOLLOWING SPENT NONHALOGENATED SOLVENTS: CRESOLS, CRESYLIC ACID, AND NITROBENZENE; AND THE STILL BOTTOMS FROM THE RECOVERY OF THESE SOLVENTS; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE NONHALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F001, F002, AND F005; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.
